a public space that is welcoming and accessible in all senses of the word.

The Event Space would be a place where the AIA/BAF and Co-tenant staff could work comfortably, in addition to their offices in the staff area. In this way the space would be active all day.
"...springs from authentic materials and literary imagination, a language that connects, recognizes the human condition...."

"...a building constructed by human hands is thus returned to nature by our dreams."

We believe the Center must contain a public space that is welcoming and accessible in all senses of the word.

The Center would communicate both an idea about Architecture with a capital ‘A’ and also the architecture of everyman. We think this can happen within the vocabulary or tectonics of production, the materials, and making of the Center. We see craft as the connection between the capital ‘A’ and the everyman. As Gaston Bachelard wrote: "...a building constructed by human hands is thus returned to nature by our dreams."
