3D LASER

THE NEXT STEP IN REALITY CAPTURE DOCUMENTATION IS NOW!

EMPOWERING YOUR CONSTRUCTION

3D Laser Scanning data is changing the way projects are built. Our experts come on-site and capture the current project conditions to efficiently and cost effectively create accurate and up-to-date data for 2D CAD drawings and 3D models, enabling workflows that can optimize the planning, design, construction, and operations stages of your project.

PASCALE STEVENS

ATTORNEYS AT LAW

The attorneys of Pascale Stevens are experienced and respected legal counselors and litigators, with significant practice focused on representing business and professionals in design, construction and real estate development. We provide legal counsel and representation in design and construction contract negotiation and review, business matters and transactions, and are routinely engaged as insurance defense counsel for litigation and claim resolution for design and construction related claims. We are proud to be able to deliver large firm, complex legal experience with the personal attention and efficiency of a small firm. We look forward to working with you.

From Problem Definition... to Problem Solved

PRESIDENTS' MESSAGE

Scott M Walters
AIA, LEED AP

2020 President, AIA Baltimore

On behalf of AIA Baltimore, the Baltimore Architecture Foundation (BAF) and the recently opened Baltimore Center for Architecture & Design, we welcome you to the directory – a resource for architecture and design. Even through a pandemic because of the help of members like you, we are connecting architects and architecture to the people across central Maryland. This directory provides a complete listing of our chapter membership, Board of Directors, Chapter Staff, Committees, and Design Award winners.

As we move into 2021, we look forward to co-hosting programs with our six co-tenants in The Center. We will take advantage of our 4,000 SF of visibility, exhibition and meeting space to convene important conversations, show Baltimore in a positive light and use our space to connect virtually and physically. We also plan for a more sustained and impactful relationship between our professional community and our future architects.

In 2021, we will also be hosting a year's long celebration of our 150th birthday.

The Center and our events would not be possible without the ongoing engagement and commitment of our architecture and design community. We hope to see you at an AIA Baltimore or a BAF event soon in the new Baltimore Center for Architecture and Design!

Thank you,

Scott M. Walters, AIA, LEED AP
2020 President, AIA Baltimore

Scott A. McGovern
2021 President, AIA Baltimore

Scott A. McGovern
2021 President, AIA Baltimore

ABOUT AIA BALTIMORE

The Baltimore Chapter of the American Institute of Architects, AIA Baltimore, celebrates its 150th anniversary in 2021. It was founded in 1871 to improve and promote the practice of architecture through continuing education and its code of ethics and professional responsibility.

Since its founding, membership and activity in the Baltimore Chapter has grown and evolved. Today, the chapter consists of over 1,300 architects, emerging professional and allied members, united to promote the profession in the Baltimore metropolitan area. The chapter's professional educational programs and outreach efforts have expanded. Committees have multiplied and broadened to provide professional knowledge-sharing and networking focused on specific areas of practice, as well as across disciplines in the design and construction industry, and to offer resources for architects at all career levels. AIA Baltimore strives to demonstrate the value of architecture and design to the public and to communities across our region.

AIA BALTIMORE CHAPTER HISTORY

The profession of architecture came into being during the third quarter of the 19th century. Before then, the “master builder” — Godefroy, Latrobe, or Mills — or the “carpenter-designer” created buildings.

In 1857, the National AIA was founded in New York by Richard Upjohn and others, including E. G. Lind and John Rudolph Niernsee of Baltimore. After the paralysis caused by the Civil War, prominent architects organized local AIA chapters in Boston, New York, Philadelphia, Chicago and Cincinnati.

Founded in 1871, the Baltimore Chapter of The American Institute of Architects is among the oldest in the country. The constitution, written by its founders, stated that “the objects of the chapter are to unite in fellowship the architects of the city, and to combine their efforts so to promote the artistic, scientific and best ethical standards of the profession.”

The practitioners and firms composing the early chapter were from two basically different generations of architects as well as architectural styles. Some had studied traditionally at noteworthy European schools; others began as draftsmen in local offices. Together they created an organization capable of facing the future and the 20th century.

In recent years, membership and activity in the Baltimore Chapter has grown and evolved. AIA Baltimore has responded to individuals’ professional needs, and to changing architectural practice. Whether promoting the values of the profession with the public, or providing advocacy with Baltimore City, surrounding counties and the Maryland State Assembly, our Chapter has made important achievements on behalf of all fellow members, architects and allied professionals in the region.

AIA Baltimore has given rise to two significant organizations: The Neighborhood Design Center — in 1968, and the Baltimore Architecture Foundation — in 1987. We revel in their success and contribution to the quality of the built environment, and to public education and scholarship on Baltimore’s architectural legacy.

Recently, the chapter headquarters has moved to One Charles Center for the creation of the Center for Architecture and Design. The Center will be AIA Baltimore and the Baltimore Architecture Foundation’s new headquarters, and will provide collaborative administrative and program space for allied professional industry, advocacy, and education organizations, including Baltimore Heritage, Inc., the Baltimore Chapter of the National Organization of Minority Architects (Bmore NOMA), the Baltimore Chapter of the Urban Land Institute (ULI Baltimore), the Maryland Chapter of the American Society of Landscape Architects (ASLA Maryland), and the Charles Street Development Corporation. The Center will also include flexible program and gallery space, and a small retail space for books on Baltimore architecture.

AIA BALTIMORE ANNUAL PROGRAMS

- 50–60 Professional Meetings and Educational Programs Each Year
- Continuing Education Seminars
- Educational Programs in: AIA Contract Documents, Building Codes and Standards, Building Envelope and Enclosure, Design Excellence, Education Facilities (K–12), Environment and Sustainability, Equity, Future Architects Resources, Health and Wellness in Design, Historic Resources, Professional Practice and Management, Residential Design, Resiliency, and Urban Design
- Future Architects Resources (FAR) Middle School and High School Outreach and Career Mentorship, and FAR Scholarship for Community College, Undergraduate and Graduate Students
- Spring Lecture Series and Design Conversations
- Allied Members Programs and Networking
- Emerging Professionals Programs and Resources: “Achieving Registration Together” ARE Prep Workshops, Hands-on Masonry Workshop, and other Materials and Technology Workshops and Tours, Mentorship Program, CivicLAB Leadership Development Program, and Annual Photo Contest
- Design Excellence Awards Competitions, Presentations, and Public Traveling Exhibitions
- Baltimore Architecture Month Public Outreach and Education Programs
- Morgan State University School of Architecture + Planning Undergraduate Research/Travel Scholarship and Presentation and AIA Baltimore Fellows Leadership Scholarship
- Annual Business Meeting/Board Elections and Holiday Party
- Gallery and Bookstore Exhibits and Openings
- Golf Outing, Lawn Party & Auto Classic

2021 COMMITTEE CHAIRS AND MEETING SCHEDULE

We encourage all members to get involved and join a committee!

Please contact the committee chair(s) for information and to confirm meeting time.

ALLIED PROFESSIONAL COMMITTEE

meets every 2nd Thursday, 8:30 a.m.

Co-Chair: Chris Lesjak

Hillis-Carnes Engineering Associates
clesjak@hcea.com

BUILDING ENCLOSURE COUNCIL – BALTIMORE

meets periodically

Co-Chair: Kevin Day, AIA

Living Design Lab
kday@livingdesignlab.com

Co-Chair: Justin Iovenitti

New Ecology
iovenitti@newecology.org

COMMITTEE ON ARCHITECTURE FOR EDUCATION

meets every 4th Wednesday at 8:30 a.m.

Co-Chair: Laura Smyles, AIA

Grimm + Parker
lsmyles@gparch.com

Co-Chair: Lauren Myatt, AIA

Murphy & Dittenhafer Architects
lmm@murphdittarch.com

COTE (Committee on the Environment)/Resiliency

meets every 4th Tuesday at 6 p.m.

Co-Chair: Ben Roush, PE-ME, FPE
FSi-Engineers
benr@fsi-engineers.com

Co-Chair: Zolna Russell, ASLA
Floura Teeter Landscape Architects
zrussell@flourateeter.com

DESIGN AWARDS

meets every 2nd Wednesday at 8:15 a.m.

Co-Chair: Marty Marren, AIA
Marren Architects
marty@marrenarchitects.com

Co-Chair: Eric Lowe, AIA
Design Collective Inc.
elowe@designcollective.com

DOORS OPEN BALTIMORE

meets every 2nd Tuesday at 5:30 p.m.

Chair: Margaret De Arcangelis
Baltimore Museum of Industry
doorsopenbaltimore@gmail.com

EMERGING PROFESSIONALS

meets every 1st Monday at 6 p.m.

Co-Chair: Charlston Britton, Jr., Assoc. AIA
BCT Design Group
charlstonbrittonjr@gmail.com

Co-Chair: Marcella Massa, Int'l. Assoc. AIA
MCA Architecture

ABOUT THE BOARD OF DIRECTORS

President – Scott A. McGovern, AIA

Scott A. McGovern, AIA, LEED AP BD+C is a senior associate at Design Collective where he serves as a project manager for a wide range of project types, including K-12 Education, multi-family/mixed use, retail/commercial, and student housing. He has a Bachelor of Architecture from Virginia Tech, from which he graduated in 1990. Scott has been actively involved in AIA Baltimore since 2010, upon joining the Design Awards Committee where he served as co-chair. He had previously served on the Board of the Baltimore Building Congress & Exchange, and as President of the Building Congress & Exchange Foundation. He is also active in the Anneslie Community Association, the historic Baltimore County community where he lives with his wife and their twin sons, and in Boy Scout Troop 102.

Immediate Past President – Scott Walters, AIA

Scott M. Walters, AIA, was born and raised in the Midwest. After receiving a master's in architecture and master's in regional and community planning from Kansas State University he headed East, landing in Baltimore. Scott is a Principal at Hord Coplan Macht in the Education Studio designing higher education and K-12 learning environments. Scott has been an adjunct faculty member at The School of Architecture + Planning at Morgan State University. Scott believes in the power of design to answer the unasked question. He is actively engaged in the community and AIA promoting design and the design process.

President-Elect – Laura Wheaton, AIA

Laura Wheaton, AIA, LEED AP BD+C is an architect with Ayers Saint Gross. After moving from Chicago to Baltimore in 2012, Laura spent six years coordinating cross-disciplinary efforts and building consensus among diverse stakeholders with the nonprofit Neighborhood Design Center. Prior to that, Laura was a volunteer leader of the Chicago Chapter of Architecture for Humanity while designing data centers with Sheehan Partners (now Sheehan Nagle Hartray). Laura is a member of the AIA's 2019 New Urban Agenda Task Force, member of the AIA Baltimore Urban Design Committee, president of her neighborhood association, and mother of two young children. She holds a Bachelor of Architecture summa cum laude from Virginia Tech.

Secretary – Martina Reilly, AIA

Martina Reilly, AIA, is a registered architect at Moseley Architects. Over her ten years of design experience, Martina has worked on multi-family, educational, and retail projects in new construction and renovation. Martina is a graduate of the University of Maryland where she graduated cum laude in Architecture with a citation in art. Martina has been a member of AIA Baltimore since 2005. She was one of the first to graduate from the CivicLAB program in 2012. She helped AIA Baltimore win the National AIA Disaster Response grant to establish the AIA Baltimore Disaster Assistance Committee and train Maryland architects in disaster assessment. She herself is a trainer for the Safety Assessment Program and continues to promote disaster preparedness and resiliency through her work with AIA Baltimore COTE + Resiliency, where she serves as committee co-chair. Martina is an active volunteer for the Neighborhood Design Center, having worked on over ten different volunteer projects over the years. She also co-founded and served as chapter leader for the Baltimore Chapter of Architecture for Humanity from 2011-2015. Martina was awarded Community Architect of the Year in 2014 for her work with AIA and continues to be active in the Baltimore community.

Treasurer – Ryan Jordan Pfarr, AIA

Ryan Jordan Pfarr, AIA, has been active in AIA Baltimore committees since moving to Baltimore and joining the architectural community 12 years ago. For most of that time he has been active on the Spring Lecture Series committee, helping with the graphics, promotion and speaker selection. After stepping away from that committee, he got involved with organizations such as USGBC. In 2015, as chair, he brought the Green Schools Conference to Baltimore for the USGBC Maryland chapter. After hosting a successful conference, he engaged with AIA Baltimore committees, specifically the COTE | R committee, where he has assisted in programming and planning efforts.

Director – Lori Lessem, AIA

Lori Lessem, AIA, is the founding principal of L2 Design Studio and has over 25 years of experience in award-winning architecture and interiors. Lori has worked on projects from the initial concepts through final move-in, bringing a creative approach and passion to each phase. Her experience includes art galleries, athletic complexes, student centers, college/university and K-12 projects, corporate interiors, and custom residential. Lori is an active AIA Baltimore member and served as co-chair of the AIA Baltimore Equity committee. Lori is committed to supporting the growth of the profession and has served on the NCARB ARE 5.0 committee for the last two years.

Director – Sara Langmead, AIA

Sara Langmead, AIA, is a licensed architect and professional engineer specializing in historic preservation and adaptive use. She draws upon her multidisciplinary background to integrate the technical aspects of preservation with the considerations of heritage conservation and the design of spaces for modern use. Sara's project experience includes educational facilities, healthcare facilities, commercial and government offices, residential communities, and maker spaces. She has worked on the rehabilitation of building types ranging from abandoned factories to a National Historic Landmark. She is particularly interested in sustainable design and retrofitting. Sara is an Associate at Quinn Evans. Sara is an active member and former co-chair of the Historic Resources Committee.

Director – Madhuri Subramaniam, AIA

Madhuri Subramaniam, AIA, holds Bachelor's degree in Architecture from Mumbai University, India, and has been working in the United States for the past 14 years. During those years she has developed design and technical skills in a wide range of projects in both architecture and interior design, including residential, educational/institutional and commercial projects. Madhuri chaired the Emerging Professionals committee from 2006-2009, served as Associate Director on the AIA Baltimore Board between 2008-2009, and was awarded the Distinguished Service Award from the chapter in the years 2006 and 2009. Recently, Madhuri served as the co-chair of the Construction committee and successfully hosted the 2017 event at BWI airport. She has also been on the AIA Baltimore Excellence in Design Awards Committee since 2005.

Director – Melanie Ray, AIA

Melanie is an Associate in the Housing/Mixed-Use studio at Hord Coplan Macht in Downtown Baltimore. A resident of Baltimore City, she is active in the design community and various neighborhoods of the city. Outside of her project-related work at HCM, she is an active member of the Social Responsibility and Student Engagement Committees and volunteers with the Neighborhood Design Center. Melanie received her Bachelor of Architecture Degree from the Pennsylvania State University in 2015 with a minor in geography, which was followed by the completion of the Urban Design Regional Employment Action for Minorities (UDREAM) Program at Carnegie Mellon University. Her leadership experience spans various organizations and activities, including her current position as the Northeast University Liaison for the National Organization of Minority Architects (NOMA) and a founding member, vice president, and treasurer of its Baltimore chapter (Bmore NOMA). As a member of the Emerging Professionals and Equity Committees, Melanie continues to cultivate her skills as an architect and assist others on the path to licensure.

Director – Gabriel Kroiz, AIA

Gabriel Kroiz, AIA founder and principle of Kroiz Architecture has over 25 years of experience as an architect, builder, and educator. As an architect, Kroiz's experience includes award-winning projects in the US and Asia. As a builder, he has focused on small, detail intensive projects which allow for a high level of research and experimentation with materials and their application. In 2008 Kroiz joined the School of Architecture and Planning at Morgan State University as its first Program Director working to achieve the school's missions of providing access to the design professions for underrepresented minorities and performing research focused on the redevelopment of Baltimore and the surrounding region. He has contributed to research about Morgan in the areas of design pedagogy and campus design. In 2017 he was co-recipient of the ACSA Diversity Achievement Award for Morgan's Beginning Design Pedagogy and this program has risen nationally to number two in the production of Black Undergraduate Architects.

Associate Director – Samuel Lynch, Assoc. AIA

Sam brings 6 + years of experience to the Ci team including single family residential, mixed used, performance venues, and public safety projects. His experience taking projects through construction administration informs his preliminary design process. He prides himself as a generalist, able to contribute to different project types in a variety of roles. In addition to Sam's professional experience, he is an active member of the community serving as co-chair of AIA Baltimore's Urban Design Committee. In this role he has spoken at AIA National and to the Baltimore City Department of Planning on the topics of community-based design and stakeholder engagement. He injects this experience into his professional work to consider often forgotten stakeholders in the design process. Sam recently contributed to the front end design of a variety of projects as well as carrying Westview Promenade through construction documentation.

Allied Member Liaison – Sandy Yellott

Sandy Yellott is focused on developing and maintaining relationships with clients in the Healthcare and Corporate vertical markets. She has a B.S. and B.S.L.A. from Cornell University and over two decades of experience in landscape architecture, interior design and project management. Her experience combines a natural sales style that highlights a genuine interest in people and a talent for communicating design vision with a passion that motivates others to follow.

Allied Member Liaison Shadow – Malindi Lankatilleke

Malindi came to the United States in 2000 after growing up around the world and developing a passion for cities and community development. She holds a Bachelor of Science in architecture and master's degrees in both architecture and urban and environmental planning from the University of Virginia. She has worked for a variety of firms including architectural design, non-profit community development, and construction management. Over the past six years, she has been a Project Manager for Southway Builders and has worked on a variety of historic properties through adaptive reuse and managed the construction of a multitude of multifamily residential units throughout Baltimore City and the greater metropolitan area. Malindi also volunteers with the Women's Committee of ABC (Associated Builders & Contractors, Baltimore Chapter) and more specifically with the annual career day for young women. More recently, Malindi was accepted into the Greater Baltimore Committee's (GBC) Next Up Program which provides networking, resources from various industries and mentorship opportunities.

NOMA Liaison – Calvin McCargo, Jr., AIA, NOMA

Calvin McCargo, Jr. is the founding member and Principle of DesignHAND Architects. He has a master's of Architecture degree from Morgan State University and over 15 years of experience in the architectural field. He is currently the President of the National Organization of Minority Architects Baltimore Chapter, Bmore NOMA, and also a lecturer at Morgan State University.

Mr. McCargo has a love and passion for architecture and people. His personal goal is to help create an accessible practice that can become a household name known for excellent and inspiring architecture focused on community empowerment and development. He is also dedicated to increasing the number of African American architects in the US.

NOMAS Liaison – Kai Carson, NOMAS

Kai Carson, a native from Hampton Virginia, is currently a senior studying to receive his degree in Architecture and environmental Design at Morgan State University. Kai served as a vice president in NOMAS in 2019–2020, where he now serves as President of NOMAS for the 2020–2021 Academic school year. Kai also serves as a mentor to younger students within the School of Architecture to help spread his knowledge and skills. Overall, Kai wants to pursue Urban Design/Planning with a focus with Biomimicry Architecture. Kai is very grateful for what this school of architecture has done for him and hopes to continue to expand on not only who he knows but also his knowledge.

AIAS Liaison – Rahmah Davis, AIAS

Rahmah Davis is currently in her third year studying Architecture and environmental design at Morgan State with honors. Rahmah served as Morgan State University AIAS Secretary during the 2019/2020 academic year, as well as the President of the Muslim Student Association on Campus. Recently she was named the AIA/ BAF Baltimore Fellows Leadership Awardee and she is excited to learn and grow in this role from professionals and mentors. She's a Baltimorean at heart but she has grown to appreciate different cultures, because of her experiences living abroad. Rahmah brings a unique perspective to AIAS at Morgan State University, one of her goals include combating social issues through community improvement and environmental design. Rahmah is thrilled to be involved with AIA Baltimore and is excited about her journey to unfold.

Fellows Liaison – Edward M. Hord, FAIA

Ed Hord is a member of the College of Fellows of the American Institute of Architects, an award-winning architect and frequent lecturer. A graduate of Washington University in St. Louis, Ed has practiced architecture for more than 36 years. Ed is a past President of the Baltimore Chapter and the Maryland Society of The American Institute of Architects and past Vice President of the national American Institute of Architects. He was honored as 2005 Consultant of the Year by the Home Builders Association of Maryland Land Development Council and often is a guest speaker at the Home Builders Association 50+ Housing Symposium.

Executive Director – Kathleen Lane, AIA

Kathleen brings to AIA Baltimore over twenty years of experience in architecture, education, nonprofit and professional association management. She served as Director of Knowledge Communities at AIA National, and has managed nonprofit architecture, arts and cultural education and academic programs in Washington, DC and San Francisco. Kathleen holds an M.Arch with a graduate concentration in Cultural Studies and Sacred Space at Catholic University, and serves as a lecturer at CUA. She has an M.A in American Studies, a graduate certificate in historic preservation from the University of Maryland, and a B.A. from the University of California, Berkeley.

REGIONAL REPRESENTATIVES

Guilherme A.M. Almeida, AIA

Regional Representative
Middle Atlantic (2021-2023)

Guilherme A.M. Almeida, AIA is a lead designer and Senior Associate at Hickok Cole, a Washington, DC based architecture firm. Gui has worked with a wide range of clients on a variety of project typologies. Most recently, he worked as design lead for a build-to-suit renovation of the American Geophysical Union's headquarters in Washington DC, shepherding base building and interiors teams through a challenging, one-of-a-kind project. Upon completion, AGU will become the region's first net zero energy commercial office renovation. He plays an integral role in the firm's high-performance design practice and constantly seeks innovative ways to apply sustainable practices and design thinking across the firm's portfolio to minimize our collective impact on the environment.

Brenden Frederick, AIA LEED AP

Regional Representative
Middle Atlantic (2019-2021)

Brenden Frederick is an Associate Principal with Becker Morgan Group. He has been with the firm for 14 years, and is a registered architect in Maryland and Delaware, holds a National Council of Architectural Registration Boards (NCARB) Certification, and is a LEED Accredited Professional. He has extensive experience in educational, public safety, healthcare, manufacturing, and multi-family projects, including serving as Project Manager on the Johnson Controls / Middletown Distribution Center and the new Datwyler Pharmaceutical plant, both located in Middletown, DE, and numerous projects with Nanticoke Health Services in Seaford, DE and Peninsula Regional Medical Center in Salisbury, MD. Brenden holds a Master and Bachelor of Architecture from Tulane University. He is an active member of the American Institute of Architects (AIA) including service as the 2017 AIA Maryland Chapter President and Chesapeake Bay Chapter Director. He also serves as a member of the Salisbury Historic District Commission, and is President elect of the Rotary Club of Wicomico County.

Kaitlyn Badlato, AIA

AIA Young Architect Regional
Director (2021-2022)

Kaitlyn Badlato is an architect in the HKS Washington, DC office. In addition to her new role as the Mid-Atlantic Young Architects Regional Director, Kaitlyn currently serves as the past chair of the AIA/DC Equity Committee by WIELD and the J.E.D.I. Champion of the HKS Washington, DC office. Her ambition to empower others and impact the AEC industry is evident in her dedication to help produce events like the WIELD Event, a night of storytelling from diverse industry leaders, and Our Forum, Our Impact, a series of conversations on social justice and systemic racism in partnership with DC NOMA, AIA/DC LA. IDEA, and AIA/DC AADU.

As an architect, medical planner, and researcher at HKS, Kaitlyn has provided design services and benchmarking documents that add value for clients and inform both the decision making and evaluation process throughout the life of a project. She enjoys working with clients and users to create inclusive healthcare environments that provide comfort and create a sense of belonging for all staff, patients, and families. She was selected as the 2016 HKS Health Fellow, a program for talented recent graduates to conduct a research project of their choice in the healthcare field. Her research has focused on developing a robust benchmarking practice for HKS Health. Kaitlyn holds a Master of Architecture and Master of Construction Management from Washington University in St. Louis. She received her Bachelor of Science in Architecture from the University of Virginia, where she also studied Urban & Environmental Planning and Global Sustainability.

Courtney Morgan, Assoc. AIA

NAC Mid-Atlantic Regional
Associate Director (2021-2022)

Courtney Morgan, Associate AIA, NOMA has been working and living in Baltimore City for the past few years after receiving her degree from Morgan State University. In her career she has strived to be a design leader who focuses on collaboration, empathy, diverse inclusion, and social impact. Additionally, Courtney has taken up the call to action by NOMA to help grow the number of minorities in the built environment profession. She actively advocates for opportunities for the next generation of architects through speaking engagements, one on one mentoring, guest critics for various architecture departments nationwide, and through k-12 STEM events.

Currently, Courtney is going into her 5th year at Hord Coplan Macht where she is a part of the Senior Living Studio and various committees. She is also continuing her education at Johns Hopkins University, Carey Business School and Maryland Institute College of Art where she will receive a Masters of Business Administration with a focus in Leading Organizations and a Masters in Design Leadership with a focus in Social Impact. Through continuing her education, service and community engagement, Courtney strives to make the architecture profession more inclusive, which she believes will lead to a more equitable and resilient future.

AIA BALTIMORE STAFF

EXECUTIVE DIRECTOR

Kathleen Lane, AIA

klane@aiabalt.com

410.625.2585 x101

Kathleen brings to AIA Baltimore over twenty years of experience in architecture, education, nonprofit and professional association management. She served as Director of Knowledge Communities at

AIA National, and has managed nonprofit architecture, arts and cultural education and academic programs in Washington, DC and San Francisco. Kathleen holds an M.Arch with a graduate concentration in cultural studies and sacred space at Catholic University, and serves as a lecturer at CUA. She has an M.A. in American Studies, a graduate certificate in historic preservation from the University of Maryland, and a B.A. from the University of California, Berkeley.

ASSOCIATE DIRECTOR, BALTIMORE ARCHITECTURE FOUNDATION

Nathan Dennies

ndennies@aiabalt.com

410.625.2585 x102

Nathan Dennies joined AIA Baltimore in 2014 as the Operations and Communications Associate. He discovered

a love for Baltimore architecture while interning at Baltimore Heritage during his final year studying English at the University of Baltimore. In early 2014, Nathan formed the Greater Hampden Heritage Alliance (GHHA), a neighborhood group dedicated to preserving the stories and places of Hampden and Woodberry.

PROGRAMS, RESEARCH & PUBLICATIONS MANAGER

Margaret Stella

mstella@aiabalt.com

410.625.2585 x103

Margaret Stella joined AIA Baltimore in March 2018, and is the Programs, Research & Publications Manager. She discovered Architectural History in college,

and graduated with her masters in Architectural History from the University of Virginia. Margaret interned with the City of Charlottesville before joining AmeriCorps and the National Parks Service to work preserving historic masonry. In her spare time she hikes with her dog and teaches yoga.

PROGRAMS AND OUTREACH MANAGER

A. Zevi Thomas, Assoc. AIA

zthomas@aiabalt.com

410.625.2585 x104

Zevi Thomas joined AIA Baltimore in July of 2014. Zevi holds a Master's in Landscape Architecture and works with a number of AIA Baltimore committees,

such as FAR architecture in schools programs, Urban Design, CivicLAB and Emerging Professionals Committee. He has also served as a Team Leader at the National Building Museum Education Department.

COMMUNICATIONS MANAGER

Olivia Miles

omiles@aiabalt.com

410.625.2585 x105

Olivia Miles joined the AIA Baltimore team in February, 2020 as the communications manager. She first discovered her love of architecture as she was studying photography and painting at

the Memphis College of Art in Memphis, Tennessee. As a city filled with buildings made by a mixture of Egyptian Revival and the luxuries of grand "old southern money", it made for a field of study as quirky and colorful as she is. You would most likely find her at an art museum or behind a good book when she isn't working.

COLLEGE OF FELLOWS

The AIA College of Fellows seeks to stimulate a sharing of interests among Fellows, promote the purposes of the Institute, advance the profession of architecture, mentor young architects, and be of ever-increasing service to society.

The College of Fellows, founded in 1952, is composed of members of the Institute who are elected to Fellowship by a jury of their peers. Fellowship is one of the highest honors the AIA can bestow upon a member. The Fellowship program was developed to elevate those architects who have made a significant contribution to architecture and society, and who have achieved a standard of excellence in the profession. Elevation to Fellowship not only recognizes the achievements of the architect as an individual, but also elevates before the public and the profession those architects who have made significant contributions to architecture and to society at a national level.

These are AIA Baltimore's Fellows:

Harold L. Adams, FAIA
Luis C. Bernardo, FAIA
Glenn W. Birx, FAIA
Michael E. Bolinger, FAIA
Gary A. Bowden, FAIA
Leon Bridges, FAIA
M. J. Brodie, FAIA
Lee Coplan, FAIA
James H. Determan, FAIA
Peter C. Doo, FAIA
Suzanne Frasier, FAIA

David H. Gleason, FAIA
Amy L. Gould, FAIA
Luanne G. Green, FAIA
James R. Grieves, FAIA
Adam A. Gross, FAIA
Anne Hicks Harney, FAIA
Edward M. Hord, FAIA
Edward C. Kohls, FAIA
Thomas A. Liebel, FAIA
David Mayhew, FAIA
Nikolaus H. Philipsen, FAIA

Alan E. Reed, FAIA
Charles H. Richter, FAIA
Albert W. Rubeling, Jr., FAIA
Walter Schamu, FAIA
Van Fossen Schwab, FAIA
Rebecca Swanston, FAIA
David V. Thompson, FAIA
Glen A. Tipton, FAIA
Bryce A. Turner, FAIA
David G. Wright, FAIA
Steve Ziger, FAIA

THE BALTIMORE ARCHITECTURE FOUNDATION

The Baltimore Architecture Foundation (BAF) celebrates design and the built environment. Launched in 1987, BAF encourages people to explore Baltimore architecture: to be mindful of the area's history, and recognize Baltimore's architectural heritage, and appreciate its design innovations.

Through its tours, lectures, educational programs for adults and kids, exhibitions, research, and publications, the BAF

**Baltimore
Architecture
Foundation**

demonstrates how ideas are manifested in the built environment and urban design of the city.

2020 YEAR IN REVIEW

We moved! In September, AIA Baltimore, BAF, Baltimore Heritage, the Baltimore Chapter of the National Organization of Minority Architects (Bmore NOMA), the Maryland Chapter of the American Society of Landscape Architects (ASLA Maryland), the Baltimore Council of the Urban Land Institute (ULI Baltimore), and the Charles Street Development Corporation, officially relocated to One Charles Center, the iconic modernist landmark designed by Mies van der Rohe. Due to the pandemic, we held our opening virtually on October 30. We look forward to the Center for Architecture and Design serving as our new headquarters, as a space to support our members and the AEC industry, to foster collaboration with allied organizations, and for outreach to our diverse communities in central Maryland on the vital role of architecture and design.

The design by Quinn Evans will fulfill our vision to make the Center for Architecture and Design serve as a high profile and visible space to showcase the important role of architects and design, and as a dynamic hub to engage professionals, students, and the

public. It will represent the forefront of design thinking and be a model for sustainable design best practices. We look forward to seeing you at our new home.

AIA Baltimore welcomes new staff member Olivia Miles. In her role as Communications Manager, Olivia supports AIA Baltimore, BAF, and MD ASLA. Olivia has a passion for the arts and elevating minority voices in design.

Nathan Dennies was promoted to Associate Director of the BAF after spending five years overseeing communications for AIA Baltimore and BAF. In his new role, Nathan is dedicating more time to serving the mission of the BAF for public engagement and outreach with the launch of the new Center.

Thank you to our Board of Directors and staff, and all the work of our members to pave the way for this exciting period of growth. Special thanks to 2020 President Scott Walters, AIA and the tireless work of our Center for Architecture and Design task group.

Welcome 2021 AIA Baltimore President

Excellence in Design Awards Celebration

The Baltimore architecture community gathered virtually via Zoom on October 23 to celebrate the AIA Baltimore and BAF Excellence in Design Award winners.

Congratulations to all the winners and thank you to all who attended for making it a memorable night. Special thanks to Elizabeth Hallas, AIA of Anderson Hallas Architects, who served as chair of this year's Denver-based jury and joined us on zoom. Thank you to Councilman Leon Pinkett for jurying the 2020 Social Equity Jury. Thank you to our committee for pivoting quickly in the early days of the pandemic and helping to create a wonderful virtual presentation. Finally, thank you to our event and annual sponsors. We missed getting to see all our wonderful student volunteers, next year!

Doors Open Baltimore

Doors Open Baltimore went virtual with a month's worth of programs. BAF hosted 43 virtual events and with over 6,000 event registrations. Nearly all the programs were recorded and can be watched on the AIA Baltimore/BAF Youtube Channel.

Center for Architecture and Design Virtual Opening

On October 30, The Center for Architecture and Design was dedicated with a virtual ribbon-cutting and virtual tour, and presentations by AIA 2021 President-elect Peter Exley, FAIA, Morgan State Architecture students, and allied organization representatives.

Committee on Architecture for Education (CAE)

AIA Baltimore and AIA DC Committees on Architecture for Education conducted a joint roundtable discussion on June 18th, 2020 focused on the immediate and long-term effects of COVID-19 on educational environments. The discussion included a series of inquiries on prominent and relevant topics discussed among five groups in two break-out sessions, and covered disparities in learning and achievements, disruptions in conventional operations, planning for resiliency, and what role architects can have in developing solutions.

Committee on the Environment | Resiliency (COTE | R)

COTE | R hosted a number of virtual programs in 2020 including a program on AIA National's Top 10 Toolkit, a presentation on the new JUST Certification, and a program on Food Insecurity with the Baltimore Office of Sustainability. The committee collaborated with USGBC on a virtual tour of the WELL Certified HCM Office and with ULI on a panel with developers on the return on investment for sustainable and net zero design and development.

We mourn the loss of co-chair Rudy Schaar, AIA, who passed away suddenly this year. We also thank Úrsula Fernández del Castillo for her service as co-chair.

We welcome 2021 co-chairs Ben Roush and Zolna Russell.

Rudy Schaar, AIA

Allied Professionals Committee

AIA Baltimore's Allied Professional members are involved in all AIA Baltimore committees and programs. Along with the Practice Management Committee, they introduced a series of virtual presentations and workshops to assist the membership in adapting to the effects of COVID-19. The committee decided to switch gears from their annual Celebrity Chef Night to create a Gingerbread Design Competition on December 10, 2020. The program was held virtually and the gingerbread structures are on display at the Center for Architecture and Design. Proceeds of the event were donated to AIA Baltimore and Baltimore Architecture Foundation scholarship programs for students of architecture at Morgan State University, and Maryland community colleges and universities.

We enjoyed a wonderful turnout for our winter fundraiser, "The Ultimate Gingerbread Design Competition".

Our guests enjoyed two festive cocktail demos, with architectural designer and mixologist Nikolas Hill and our virtual audience watched as eight teams battled for the top prize, showing off their dazzling designs through the medium of video!

First Place: Winans Chapel By Bridget Nugent

Jury Comments: Superior Gingerbread Assembly – true to traditional methodology. Use of frosting as mortar is commendable. Flickering lights innovation appreciated.

Emerging Professionals

As a result of the success of AIA Baltimore COVID-19 Virtual Town Hall in March, AIA Baltimore EPs organized a follow-up event which provided a special forum for Associate AIA members, emerging professionals, and recent graduates the opportunity to discuss along with seasoned professionals the possible implications of the COVID-19 pandemic on the future of the profession.

And, to kick-off the fall season of events, the EPs hosted their annual Mentorship Roundtable in September, which brought together practitioners at all career stages: from students to recent graduates, and from mid-career to seasoned professionals. This event offered an opportunity to receive and share career advice and experiences. The goal is to build professional networks and foster ongoing mentoring relationships. Participants with varying experience levels are encouraged to get to know one another and stay connected.

CivicLAB

CivicLAB provides young architects with the skills to become citizen architects through a series of presentations focusing on advocacy, leadership skills and pressing issues in the profession. Participants have the opportunity to travel to the Maryland State Capital as part of Advocacy Day. The group also joins AIA members from across the state and members of Preservation Maryland for meetings with members of Maryland State Legislature and staff.

The Class of 2020 brings the total number of CivicLAB graduates to over 55 since it started eight years ago.

Delegation at 2020 AIA MD Advocacy Day January 2020

Laura Wheaton AIA presenting at AIA Grassroots Leadership and Advocacy Conference February 2020

Equity Committee

In many ways, 2020 was a watershed moment on matters of social justice and calls to dismantle systemic racism. In this context, Equity redoubled its commitment this year, certainly to equity in the profession but, also expanded this effort to include justice, equity, diversity, and inclusion in the built environment. The committee widely circulated a list of locally owned women and minority businesses for members to support. This was underscored as part of Equity's Virtual Happy Hour this year. A networking event that offered access to industry professionals, in particular, women and minorities within the design, construction, and real estate industry. This happy hour gave leaders from CREWBaltimore, NAWIC (National Women in Construction), Bmore NOMA (National Organization of Minority Architects) and WLI (Women Leadership Initiative – Urban Land Institute) the opportunity to connect, share resources, and learn about the remarkable work each organization is doing to shape the future of the AEC industry.

In 2021, the committee plans to continue collaborating with other AIA Baltimore committees on programming addressing equity challenges faced by women and minorities in the profession.

Practice Management Committee

In response to the COVID-19 pandemic and its potentially disruptive effects on the practice of architecture and the economy, Practice Management along with the Allied Professionals committee introduced a series of virtual presentations and workshops to assist the membership in adapting to this new paradigm. Topics from how to obtain loans from the Paycheck Protection Program (PPP) to 8 Ways to Reinvent Yourself in a Crisis all served as a welcomed resource for so many. These and many more virtual presentations in the Response to COVID-19 series are available on AIA Baltimore YouTube Channel.

AIA Baltimore Fellows

On October 29 AIA Baltimore's Fellows held the 7th Annual AIA Baltimore/BAF Fellows Scholarship Dinner virtually. Befitting the evening's theme of Leadership, the event celebrated guest speaker Frances Halsband, FAIA, who offered reflections and reminiscences of her distinguished career. We celebrated AIA Baltimore's newest fellow, Lee Coplan, FAIA and honored the life of John Hill, FAIA.

Co-chaired by Suzanne Frasier, FAIA and Tom Liebel, FAIA, the event raised over \$5,500 for the BAF/Fellows Leadership Award Scholarship to support undergraduate students at the School of Architecture + Planning at Morgan State University. Scholarships went to Courtney Souvenir, and Rahmah Davis, and graduating student, Brain Helfer.

Future Architects Resources (FAR)/Kids in Design

Although the FAR Committee had its usually busy schedule of outreach events hampered by restrictions on public gathering, nevertheless, FAR was quick to adapt; unveiling Lunch with An Architect (LWA). Throughout the summer months, LWA offered local youth a one-of-a-kind opportunity to virtually meet with Baltimore-area architects to discuss career paths in architecture, favorite buildings, why design matters, how much math you really need to know as an architect, and much more!

The committee gave four FAR Student Design Awards to community college undergraduate and graduate students pursuing architecture degrees. 2020 marked the seventh year of the program.

CannonDesign & Mahan Rykiel Associates, Sheppard Pratt Health System

Health & Wellness Design Committee

In early spring, the AIA Baltimore Health & Wellness Design Committee hosted the 5th annual Good Health = Good Design showcase, which is an opportunity for all industry leaders to present work that, in one way or another, speaks to healthy design. This event was held at the offices of Burdette, Koehler, Murphy and Associates where over 80 attendees gathered to share their unique projects, both built and unbuilt, with the audience. Presenters highlighted each project's positive impact on health and wellness for individuals, communities, and more broadly, the environment.

Schamu Golf Outing, Auto Classic and Lawn Party

Unfortunately due to COVID-19, we had to postpone the 2020 Schamu Golf Outing, Auto Classic and Lawn Party.

Charles Brickbauer presentation on Marbury Building

Historic Resources Committee (HRC)

The Historic Resources Committee collaborate with the BAF Tours Committee to offer virtual presentations including a presentation on the legacy of Brutalist Architecture, a presentation on the Marbury Building by Charles Brickbauer, and a presentation on the history of Charles Center coinciding with the Center for Architecture & Design's grand opening.

The committee is also working on advocacy in support of the CHAP Tax Credit.

2020 AIA Baltimore/BAF Spring Lecture Series

The 42nd Spring Lecture Series took the theme “Unbuilt.” Local practitioners and globally recognized designers and scholars addressed “their unbuilt, speculative, and/or dismantled work, including competitions, explorations, and research”. The series explored why projects go unrealized and create a dialogue about what could have been, what is, and what can be.

AIA Baltimore/BAF Gallery

2020 saw the final exhibition at the chapter house at 11 1/2 West Chase Street. Artist and Associate AIA member, Kevin Miller, wowed us with his intriguing graphics representation and digital modelling prowess. We look forward to an expanded exhibition space at the new Center for Architecture and Design. Starting next spring with Say it Loud – a traveling exhibit from Beyond the Built Environment.

BAF Groundhog Day Party

Each year the BAF selects a memorable space in Baltimore to throw it's Groundhog Day Party to raise funds for our many programs. On February 1, guests gathered at the Eastern Pumping Station, recently renovated by Ziger | Snead Architects to be the Baltimore Pumphouse. Special thanks to American Communities Trust for allowing us to use the space.

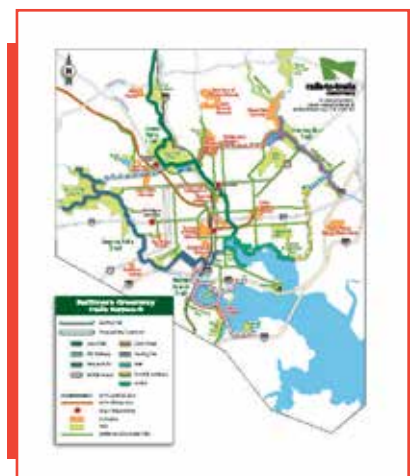

Patapsco Strand, from Unknown Studio, presented during “Unbuilt Futures” lecture.

Baltimore Architecture Month

Each October we celebrate Baltimore Architecture Month, including some of our biggest programs and events organized by allied organizations around the city. Doors Open Baltimore took over Baltimore Architecture Month with over 40 virtual programs.

Urban Design Committee

In 2020 UDC continued its advocacy by collaborating in a series of community engagements with local organizations like Rails-to-Trails Conservancy on a series of charrettes and forums to assist in the development of a proposed Baltimore Greenway Network with the aim of making Baltimore a more equitable and connected city. The committee was also instrumental in facilitating the visit of the traveling exhibit for racial justice, Society's Cage. Society's Cage is an interpretive installation born in the aftermath of the murders of George Floyd and Breonna Taylor at the hands of law enforcement officers. This exhibit embodies a movement where society reckons with the legacy of institutional racism. Society's Cage was developed by SmithGroup's DC office and previously exhibited in Washington, DC on the National Mall and later made its first stop on a national tour at Baltimore War Memorial Plaza.

AIA Code of Ethics

Members of The American Institute of Architects are dedicated to the highest standards of professionalism, integrity, and competence. The following principles are guidelines for the conduct of members in fulfilling these obligations:

Ethics

FROM THE OFFICE OF GENERAL COUNSEL

CANON I

General Obligations

Members should maintain and advance their knowledge of the art and science of architecture, respect the body of architectural accomplishment, contribute to its growth, thoughtfully consider the social and environmental impact of their professional activities, and exercise learned and uncompromised professional judgment.

CANON II

Obligations to the Public

Members should embrace the spirit and letter of the law governing their professional affairs and should promote and serve the public interest in their personal and professional activities.

CANON III

Obligations to the Client

Members should serve their clients competently and in a professional manner, and should exercise unprejudiced and unbiased judgment when performing all professional services.

CANON IV

Obligations to the Profession

Members should uphold the integrity and dignity of the profession.

CANON V

Obligations to Colleagues

Members should respect the rights and acknowledge the professional aspirations and contributions of their colleagues.

CANON VI

Obligations to the Environment

Members should recognize and acknowledge the professional responsibilities they have to promote sustainable design and development in the natural and built environments and to implement energy and resource conscious design.

For the full version of the AIA Code of Ethics and Professional Conduct, please visit:

[www.aia.org/pages/](http://www.aia.org/pages/3296-code-of-ethics-and-professional-conduct)

WHY YOU SHOULD HIRE AN ARCHITECT

Few people realize how complicated it is to build – that is until they find themselves lost in a maze of design options, building codes, zoning laws, contractors and so on. No two building projects are exactly alike, so there is no single, clear-cut path to follow.

The architect is the one professional who has the education, training, experience and vision to guide you through the entire design/construction process, from helping you define what you want to build to helping you get the most for your construction dollar.

Architects see the big picture. They don't just design four walls and a roof – they create total environments, interiors and exteriors, that satisfy functional needs and are exciting, dynamic spaces in which to work and live.

Whether you are remodeling, adding on, or building from scratch, an architect can guide your way. Working with contractors and other construction professionals, architects can help you end up with a well-designed project that meets your need and works with your budget and time frame.

The Architect Solves Problems

Most building projects start with a want or a need. “I need more file space in my office.” Or, “We’ve outgrown our house.” But how does that need or want get translated into square feet and three-dimensional space?

That is what architects are trained to do – solve problems in creative ways. With their broad knowledge of design and construction, architects can show you alternatives and options you might never think of on your own.

Need more room for your growing family? An architect can show you how to enlarge your home so you don't have to move. Not sure how fast your business is going to grow? An architect can design an office that meets your needs today and can be adapted for tomorrow. Have a limited budget? The architect looks for ways to make your project cost effective.

The Architect Can Save You Money

The architect's services are a wise investment for the money, not an added cost to your project. Why?

A well-conceived project can be built more efficiently and economically. Architects plan your projects with you. As your ideas evolve, changes can be made on paper – much less expensively than later on when construction is underway. Thorough drawings also make it easier for the contractor to accurately price and build your project.

Energy efficient buildings can save you money on fuel bills down the road. An architect can design a building to maximize heating from the sun and let in natural light, thus reducing your heating, cooling and electric bills over time.

The architect can work with your budget and help you select the appropriate materials and workmanship at a fair price. Architects develop the drawings and specifications to help you get bids for construction that are based on your requirements.

An architect can help you choose materials and finishes that are durable as well as beautiful, saving on frequent maintenance and replacement costs. Architects work to stay abreast of advances in roofing, brickwork, floor tiling, paint finishes, etc. Their familiarity with the full range of materials enables them to suggest the appropriate materials for your project.

Good design sells. A well-designed house has a higher resale value. A well-designed work environment attracts employees and increases productivity.

The Architect Can Make Your Life Easier

Let's face it: building is a long process that is often messy and disruptive, particularly if you are living and working in the space under construction. The architect you hire looks out for your interests and tries to find ways to make that process go smoothly.

If your project requires engineering or other design services, the architect can coordinate this team of experts so you don't have to. The architect sorts out complex building codes and zoning laws. The architect can help you find qualified construction contractors based on your requirements. The architect visits the construction site to help verify that the project is being built according to plans and specifications.

Each architect has his or her own style, approach to design, and methods of work. So it's important to find an architect who understands your style and needs. If you have already worked with a particular architect and feel comfortable, it makes sense to call him or her again. If not, you'll have to do a little work.

A Little Homework Goes a Long Way

First, think carefully about your building needs and goals. Do you need more space? What activities will be housed in the space? How much can you spend on the project? How will you finance it? Where will it be located? Do you plan to do some of the work yourself? Don't worry if you don't have all the answers. The architect can help you clarify your goals, if necessary.

Start building a list of potential architects. Find out who designed projects in your community that you like. Get recommendations from friends, relatives, acquaintances, or the local AIA Chapter. Check to see if the architect is a member of The American

Institute of Architects (AIA). Membership in the AIA means that the architect subscribes to a professional code of ethics and has access to a variety of professional and technical resources.

Call each firm on your list. Describe your project and ask if they are available to take on your project. If they are, request literature outlining the firm's qualifications and experience. If the office is unable to handle your project, ask if they can suggest another firm.

The materials you receive from interested firms might include a letter of interest, brochures, fact sheets, photos of past work, and biographical material about key personnel. Look beyond the style of the brochure to determine which firms have the right experience and capabilities for your project. At this point, you should be able to narrow your list to two or three architects you will interview.

Interviewing an Architect

Talking Chemistry

The interview is crucial because it gives you a chance to meet the people who will design your project and to see if the chemistry is

right. Remember, you will be working with the architect for a long time. You want someone with whom you feel comfortable.

Allow at least an hour for the interview. The meeting might take place at the architect's office – helpful because you can see where the work will be done. Or the interview could be held at your home or office – helpful because the architect can learn more about your project and needs – whichever feels right. The architect may show you slides or photographs of past work and describe how the firm's experience and expertise will help you. While many architects do not charge for this interview, some do. Before the interview, ask if there is a fee.

During the interview, ask questions. How busy is the firm? Does it have the capacity to take on your work? Who will handle the job? Insist on meeting the person who will actually design the project. What is the firm's design philosophy? How does the architect intend to approach your project? How interested is the firm in your job? Talk about your budget and find out the range of fees that the architect would anticipate for your project. Before making a final selection, have the architect take you to one completed project.

It is proper to ask your architect for references from past clients. These references are invaluable.

If, during the course of the discussion, there is something you don't understand, ask the architect for clarification. If you feel intimidated or if the architect doesn't explain things in a way that you can understand, then he or she may not be right for you.

Making the Final Cut

Ultimately, you will choose the architect whom you trust and feel is right for your project. Unlike buying a car or a new appliance, you can't see the final product and test it out. The architect provides professional services, not a product. The right architect will be the one who can provide the judgment, technical expertise, and creative skills, at a reasonable cost, to help you realize a project that fits your practical needs as well as your dreams.

A Word About How Architects Get Paid

How architects charge for their services can be confusing to first-time clients. There is no set fee for a particular type of project. Fees are established in a number of ways, depending on the sort of project, and the amount and nature of the services best suited to your unique needs.

Some projects are best done at hourly rates; others for a stipulated sum per unit, based on what is to be built (for example, the number of square feet, apartments, rooms, etc.). Some architects charge a fixed fee, others charge a percentage of construction costs. Whenever you feel it is appropriate, discuss with your architect how he or she would expect to establish the fee on your project. The architect may suggest a combination of the above methods. The basis for the fee, the amount, and payment schedule are issues for you and your architect to work out together.

Team Work

The best building projects are created when the client and architect work together as a team. Take an active role. Don't delegate decision-making to a spouse or business partner unless you are prepared to live with his or her decisions.

Designing a building is an exciting, creative challenge. The process can be fun, satisfying, and positive. If at any time in the design process you are uncomfortable, discuss your concerns with your architect. You don't want the architect to control the project to the point that the building is no longer yours. But you also want to be careful not to restrict the architect so much that you are not getting your money's worth in terms of design creativity.

Get It in Writing

Once you have found the architect, you are ready to put in writing the terms of your agreement on the scope of work, services, schedule, construction budget, and architect's compensation. This written agreement can take many forms. The AIA has developed a variety of standard contract forms which are used industrywide.

20 QUESTIONS TO ASK YOUR ARCHITECT

1. What does the architect see as important issues or considerations in your project?
What are the challenges of the project?
2. How will the architect approach your project?
3. How will the architect gather information about your needs and goals?
4. How will the architect establish priorities and make decisions?
5. Who from the architecture firm will you be dealing with directly?
Is it the same person who will be designing the project?
Who will be designing your project?
6. How interested is the architect in this project?
7. How busy is the architect?
8. What are the steps in the design process?
9. How does the architect organize the process?
10. What does the architect expect you to provide?
11. What is the architect's design philosophy?
12. What is the architect's experience/track record with cost estimating?
13. What will the architect show you along the way to explain the project? Will you see drawings or sketches?
14. What services does the architect provide during construction?
15. How disruptive will construction be? How long does the architect expect it to take to complete your project?
16. What sets this architect apart from the rest?
17. How does the architect establish fees?
18. What would the architect expect the fee to be for this project?
19. If the scope of the project changes, how will additional fees be determined?
20. Do you have a list of past clients that the architect has worked with?

THE AMERICAN INSTITUTE OF ARCHITECTS

THE STEPS INVOLVED IN DESIGN AND CONSTRUCTION — WHAT TO EXPECT

Design and construction projects involve several steps. Typically, projects go through the following six phases. However, on some projects, several of these steps may be combined or there may be additional ones.

STEP

1

Programming/Deciding What to Build

The homeowner and architect discuss the requirements for the project (how many rooms, the function of the spaces, etc.), testing the fit between the owner's needs, wants, and budget.

STEP

2

Schematic Design/Rough Sketches

The architect prepares a series of rough sketches, known as schematic design, which show the general arrangement of rooms and of the site. Some architects also prepare models to help visualize the project. The homeowner approves these sketches before proceeding to the next phase.

STEP

3

Design Development/Refining the Design

The architect prepares more detailed drawings to illustrate other aspects of the proposed design. Floor plans show all the rooms in correct size and shape. Outline specifications are prepared, listing the major materials and room finishes.

STEP

4

Preparation of Construction Documents

Once the homeowner has approved the design, the architect prepares detailed drawings and specifications, which the contractor will use to establish actual construction cost and build the project. These drawings and specifications become part of the building contract.

STEP

5

Hiring the Contractor

The homeowner selects and hires the contractor. The architect may be willing to make some recommendations. In many cases, homeowners choose from among several contractors they've asked to submit bids on the job. The architect can help you prepare bidding documents as well as invitations to bid and instructions to bidders.

STEP

6

Construction Administration

While the contractor will physically build the home or addition, the architect can assist the homeowner in making sure that the project is built according to the plans and specifications. The architect can make site visits to observe construction, review and approve the contractor's applications for payment, and generally keep the homeowner informed of the project's progress. The contractor is solely responsible for construction methods, techniques, schedules and procedures.

SELECTING AN ARCHITECT

Frequently Asked Questions:

1. Do I need an architect for my project?

If you haven't worked with an architect before, you may wonder whether your project really requires it. Particularly if your project is your personal residence, it may not seem necessary. No one can tell you definitively whether you require the services of an architect, but we encourage you to learn more about what architects do, and to see how architects affect their clients' satisfaction with the final building project.

2. What services do architects provide?

Architects see the big picture when it comes to your project. They help you explore what appeals to you aesthetically and what you require functionally. They coordinate teams of design, engineering and construction professionals; they sort through the maze of building codes and zoning requirements; they ensure your project is built the way it was intended.

3. Why should I hire an AIA architect?

Members of the American Institute of Architects adhere to the AIA Code of Ethics and Professional Conduct, assuring you of their dedication to the high standards of professional practice. AIA architects also fulfill annual continuing education requirements to maintain their professional standing and stay current in the profession.

4. At what point in my project should I involve an architect?

As soon as you decide you want to build something new, you should start looking for an architect. Architects provide important pre-design services including site evaluation, and can help you explore options you may not have considered. Involving an architect early in the process can help avoid costly missteps, and increase the likelihood of your satisfaction with the project.

5. How do I find the right architect for my project?

It is critical to find an architect who makes you feel comfortable, and with whom you have open communication. It's also important to find an architect with experience in your project type.

6. Don't architects add substantial cost to a project?

While it's true that architects' fees are an additional project cost, hiring an architect can actually save you money in many ways. Architects can monitor your budget and negotiate to get the best materials and workmanship at a good price. An architect's design can reduce energy and maintenance costs. They can turn a difficult lot into a successful building site. And they spend time planning and fully developing your ideas to avoid changes once construction is underway.

7. How are architects compensated?

An architect's compensation can be based on time, a stipulated sum, a percentage of the cost of the work, the project's square footage, unit cost (based on number of rooms/apartments, etc.) or royalty in which compensation is a share of the profit derived from the project. Time-based compensation and stipulated sums are most common.

8. What is my role in the design process?

Your architect will depend on you to communicate about your design preferences, functional requirements, and budget. Your timely response to questions and design submissions will help keep the project on track. It is also important for you to raise any concerns you have as the project proceeds so they can be addressed in the earliest stages. Working in partnership with your architect, you will help ensure the best possible outcome for your project.

For more information, videos and downloads, visit www.aia.org

The Five Phases of Design

The architectural design process consists of five phases. As you begin working with an AIA architect, or consider hiring one, it's helpful to know where you are in the process and where it will take you. An AIA architect will orient you during each phase, and work with you to get the most value from each stage of the process. It's a time-tested method for establishing a close working relationship between you and your architect, and producing the very best building.

Phase 1: Originate

This first phase includes all the discussions, thought, and exploration that lead to the moment when you realize you need to building something new. The phase ends with your decision to move forward with a project.

Phase 2: Focus

Here you define the project – its scope, features, purpose, and functionality. This is the time to select an architect and establish an owner-architect agreement. Together with your architect, you develop and refine a “vision” for the project. Your architect leads you through a “programming” exercise to help you explore the needs of those who will live, work or play in the space you create. You will identify the services you need from your architect and the design team will begin to form a cohesive relationship and shared concept for the final building.

Phase 3: Design

Once the requirements of the project are determined, the design phase begins. Your architect gives shape to your vision through drawings and written specifications. Your input into this phase is vital, as you get the first glimpses, and then a more defined look at how your building will take shape. It is important to establish a clear decision-making process with your architect during this phase. The design phase ends when you agree to the plans that will guide construction.

Phase 4: Build

The contractor who will construct your building becomes the most active member of the team during this phase. Investments are made in materials, and timetables are extremely important. Good communication within the project team is critical, as the need for changes often arises. This is typically the time of highest stress for the project owner. Your architect will discuss changes and options with you and ensure that alterations are compatible with your vision for the project.

Phase 5: Occupy

This phase begins the day the project is up and running and never really ends. It's where your satisfaction with the project is determined. If you are turning over the project to others who will ultimately use it, good communication during the process is important. Your architect can help ensure that the terms of your building contract were met, and can use the experience of the project to inform future work, should you team together again.

2019 AIA BALTIMORE AND BAF EXCELLENCE IN DESIGN AWARDS WINNERS

Congratulations to the winners of the 2019 AIA Baltimore and BAF Excellence in Design Awards. The program recognizes excellence in architectural design by AIA Baltimore members and AIA members with projects in AIA Baltimore's region, and contributions to architecture and its understanding in Baltimore through the BAF Golden Griffin and Roger D. Redden Awards. Built and unbuilt projects submitted by AIA members were judged by a distinguished jury of AIA architects, this year based in New Orleans. It was an exciting year for the Design Awards with the addition of the new Exceptional Detail Award, and the second Social Equity Design Award organized jointly with the Neighborhood Design Center.

2019 AIA New Orleans Excellence in Design Awards Jury

Melissa Bauld Rome, AIA, Rome Office // Jury Chair

Melissa Rome is a founding partner of the New Orleans-based architecture firm Rome Office. The Office's work is diverse in type and scale and has won national design competitions and numerous design awards. Melissa, together with her partner Brian, leads the design and realization of the studio's projects and strives to create unique, simple, well-executed architectural solutions with the goal of enhancing people's awareness of self, environment, and time.

Melissa has served as an adjunct professor at Tulane University and continues to serve as an invited lecturer and critic. She and Brian have additionally taken on the role of organizing the Louisiana AIA Celebrate Architecture design symposium, an annual event that brings together internationally recognized architects to share their recent works and explore current trends of practice.

Before founding Rome Office, Melissa was a project designer and manager at Bjarke Ingels Group in New York City. At BIG, she served as both project designer and manager for the award-winning Vancouver House development. She received her Master of Architecture degree from Yale University and a Bachelor of Arts in Architecture and Modern Language from Clemson University.

Victor F. "Trey" Trahan, III, FAIA, Trahan Architects

Victor F. "Trey" Trahan, III is the founder and design principal of Trahan Architects' New Orleans, New York, and Chicago studios. He received the Architecture Review Emerging Architecture Award in London in 2005, and was elected to the AIA College of Fellows in 2006. Since Trahan Architects was established, it has built a portfolio with a wide range of building types and scales, including academic, cultural, ecclesiastic, residential, commercial, mixed-use and urban projects throughout the U.S. and overseas. In 2018, the firm was ranked #9 among top design firms in the U.S. by *Architect Magazine*. Trahan Architects has won over 75 national, regional, and local awards along with several international design competitions. The firm's work has been published in more than 40 countries.

Trey was a visiting critic and distinguished lecturer at the School of Architecture at Carnegie Mellon University (2017). Past teaching engagements include a graduate studio on design approaches for coastal landscapes at the Massachusetts Institute of Technology School of Architecture and Planning in Cambridge, Massachusetts (2013). He has lectured nationally and internationally. He is a member of the global advisory board for the Van Allen Institute in New York and a board member of The Cultural Landscape Foundation in Washington, DC, a nonprofit that educates and engages the public in our shared historical landscapes.

Judith Kinnard, FAIA, Tulane University

Judith Kinnard is nationally recognized for her impact as a leader in architectural education. In addition, she is a highly regarded teacher and award-winning designer. She received the ACSA Distinguished Professor award in 2018. She is past-President of the NAAB and the ACSA. Kinnard started her teaching career at Syracuse University in 1979, shortly after completing her professional degree at Cornell University. She was one of the first women teaching design studios at Syracuse, Princeton and the University of Virginia, and was the first woman architect to be tenured at the University of Virginia. She taught at Virginia for 22 years and served as chair of the architecture department from 1998-2003. She has been active in professional, and community-focused organizations, holding seats on various advisory boards, including Tulane's Albert and Tina Small Center for Collaborative Design. In 2011, she was named one of the 25 Most Admired Educators by Design Intelligence. She was awarded fellowship by the AIA in 2004 for leadership in architectural education.

Throughout her career, Judith has maintained an active commitment to practice and has developed an approach characterized by sensitive and innovative solutions to issues of site and program. Her work has included numerous small-scale built commissions, and more than a dozen national competitions dealing with larger scale issues of urban design, cultural institutions, and housing.

2019 Excellence in Design Awards Jury

Crystal Mitchell, AIA, Sizeler Thompson Brown Architects

Crystal Mitchell is a graduate of Tulane University School of Architecture and has had the opportunity to be part of a range of interesting projects types including commercial, residential, recreational and community centers. Her primary focus has been campus and educational projects. They range from pre-K to 12, of which some are in the process of attaining, or have attained LEED Silver Certification. With work on several university campuses, her higher education experience includes the wide variety of projects that campuses offer. Campus planning, academic buildings, science facilities, recreation centers, and dormitories are a few of the project types that have contributed to her experience. Crystal resides and works in New Orleans and is committed to effective and sustainable design that serve the community and end users well.

Julie A. Babin, AIA, studioWTA

Julie Babin is a partner at studioWTA, an award-winning practice in New Orleans. Her work spans a variety of scales and project types including institutional, commercial, residential, and mixed-use projects. In her 13 years of experience, Julie has built a reputation for designing buildings that are both contextual and contemporary. In doing so, her work has received numerous state and regional awards including awards from the American Institute of Architects, The Louisiana Landmarks Society and the New Orleans Downtown Development District. In 2016 Julie was named “Master of Architecture” by *New Orleans Homes + Lifestyles Magazine*.

Julie currently serves as Vice President of the AIA New Orleans Executive Board. In 2018, she was the Young Architect Forum (YAF) Representative and crafted design-centric programming for the Louisiana State Conference including a ‘Design Matters’ panel with international speakers. A graduate of Tulane University, Julie earned a Master of Architecture and was awarded the prestigious John W. Lawrence Memorial Medal for Design Excellence in recognition of her outstanding work in design and academics.

Nick Marshall, AIA, Chase Marshall Architects

Nick Marshall is the Design Director for Chase Marshall and director of the New Orleans office. He is licensed in the state of Louisiana and has 26 years of experience in the core elements of architecture required to design, detail, document, and build buildings. Nick is also a 14 year LEED certified veteran and has a deep understanding of how projects are connected to their site and environment. He has collaborated in the development of numerous projects of varied scales and complexity, ranging from high-tech national research laboratories to reception desks throughout the country. Nick has a master’s degree in Architecture from Tulane University.

Nick serves the local architecture community as board chair for the New Orleans Architecture Foundation, as board chair for the Neighborhood Housing Services, and is a past AIA New Orleans president.

2019 Excellence in Design Awards Good Design=Good Business Jury

Brian Grieb, AIA, Morgan State University School of Architecture + Planning

Brian Grieb, AIA, is a practicing architect and co-founder of GriD architects in Annapolis, Maryland and serves as a tenured Associate Professor in the School of Architecture + Planning at Morgan State University. A hands-on professional by nature, Brian is intimately involved in all phases of the design process, leading projects from concept design through construction administration. He relishes working collectively with builders and craftsman to interpret and fully realize the client's vision every step of the way.

Under his guidance, the firm's diverse body of work has been featured in various design publications and honored with over 15 design awards. In both practice and the classroom, Brian embraces a design philosophy that great architecture is inherently sustainable, considerate of the environment while embracing the culture, craft and materials of the region. His most recent projects recognized for design excellence include Tap House, Spa Creek House, and the renovation and addition to the 706 Giddings Office Building.

Chris Ryer, City of Baltimore, Planning Department

Chris Ryer began working in community development over 30 years ago as an intern at the Baltimore Planning Department. After ten years as a community planner with the Department, he moved to the non-profit sector where he worked for the Trust for Public Lands and a community-based organization in southwest Baltimore.

In 2002 he returned to the Baltimore Planning Department where he served as Chief of Comprehensive Planning and Deputy Director. After a short period at the Maryland Department of Housing and Community Development, he served as the Director of the Southeast Community Development Corporation for over ten years before returning to the Planning Department as Director in 2019.

Mark Caplan, The Time Group

Mark Caplan, is a Baltimore native active in real estate investment and management as well as equipment and vehicle financing in the region. He is the President and CEO of The Time Group, a real estate equity firm where he has worked since the mid-1970s. The Time Group has interests in approximately 6,500 units of multi-family, manufactured housing, and senior living. He is also a founder and is currently the Chairman of WPM Real Estate Management, a manager of multi-family properties as well as other property types currently comprising in excess of 20,000 units.

In addition to his real estate activities, Mr. Caplan is Chairman of Madison Capital, an independent vehicle and equipment financing firm he and his father, Caswell, founded in 1984. Mr. Caplan is a member of the Board of Directors at Capital Bank, and he is active in the non-profit community in Baltimore, having served or currently serving on the Boards of The Walters Art Museum, The Bryn Mawr School, The Gilman School, Center Stage, B.E.S.T., Charles Street Development Corp., Real Estate Advisory Board of Columbia Business School, and St. Ignatius Loyola Academy.

2019 Social Equity Design Award Jury

Kathleen Starghill-Sherrill, AIA, SP Arch Inc.

Kathleen, a past-President of AIA Baltimore, is the first African-American president of the chapter. She is a champion of diversity and has worked in many different capacities during the course of her career which include both public and private work, teaching in grade school and as an adjunct at Morgan State University, traditional practice and now in her own firm. She continues to mentor her staff, students and young professionals at all levels.

Kathleen brings a viewpoint exclusive to small firms and even more so exclusive to a minority woman-owned firm. Kathleen manages her firm as its principal architect and has over 26 years of experience in the profession. Her many areas of expertise include architectural design, project management, historic restoration, preservation and adaptive reuse, detailing, Green Design and LEED Certification, and construction period services.

Evan Richardson, School of Architecture + Planning

Evan Richardson, a native of Newark, New Jersey, is the Assistant to the Dean for the School of Architecture & Planning at Morgan State University (MSU).

Before joining MSU, Evan worked in Baltimore's Mayor's Office of Neighborhoods as a Neighborhood Liaison, where he assisted community groups in the implementation of neighborhood action plans and programs. Prior to the Mayor's Office, Evan was employed as a Program Coordinator with the Neighborhood Design Center (NDC). In this role, Evan recruited volunteers for various community design projects in Baltimore City and Baltimore County.

Evan's interests include community outreach and volunteerism. In 2009 Evan was appointed by Governor Martin O'Malley, Commissioner for the Maryland Commission for African American History and Culture. And in 2013, Evan joined the Board of Directors for NDC, where he served as Board President in 2016-2018.

A resident of Baltimore City, Evan earned his master's degree in landscape architecture from MSU in Baltimore.

Mark Nook, AIA Quinn Evans

Mark's experience includes the design of public and private schools, college and university facilities, museums and visitor centers, and residential and mixed-use communities. His projects reflect his expertise in the development of high-performance building envelopes, with innovative sustainable strategies.

Mark brings an insightful and knowledgeable perspective to design projects, working closely with clients to optimize buildings for long-term use, value, and impact. He enjoys crafting streamlined solutions that solve multiple problems at once while building a clear consensus to ensure efficient, effective, and thoughtful results.

2019 AIA Baltimore Future Architects Resources (FAR) Scholarship Award Jury

Lonna Babu, AIA, Design Collective

Lonna attended the University of Maryland, College Park where she received her Bachelors of Science in Architecture and Art History minor in 2016 and a Master of Architecture in 2018. She graduated with the Faculty Award for Achievement in Design and the Thesis Prize for Excellence. Lonna previously interned at SETO Architects in Baltimore and ZGF Architects in DC working on both small-scale residential projects up to large scale urban planning proposals. In 2017 she joined Design Collective as a summer intern and recipient of their Scholarship/Internship program working on student housing proposals and returned in 2018 after graduation. She is currently working on mixed-use and multi-family projects in Silver Spring, as well as various student housing proposals and projects.

Lonna joined AIA Baltimore as a member last year after joining Design Collective and is now one of the co-chairs of the Future Architect's Resources (FAR) Committee. Through this leadership position she is excited to plan events and work with others to inspire the next generation of architects.

Jonathan Cartwright, Assoc. AIA, BCT Design Group

Displaying an interest in art from an early age, Jonathan Cartwright developed a natural talent for creative expression. During his formative years, this led him to enter several art programs and competitions where he received honors for individual and group submissions. In 2003, he received an Associate of Arts in Architecture from The College of The Bahamas and a Professional Bachelors of Architecture in 2006 from Howard University. During his tenure he was both a member of AIAS and the Architecture Student board. Jonathan is currently the Emerging Professionals Committee co-chair, being involved with many Chapter initiatives, most notably the ARE 5.0 study groups and organizing the Achieving Registration Together (ART) program. He is currently pursuing accreditation and is also on the Board of Directors for AIA Baltimore.

Emily Lodato, Assoc. AIA, Design Collective

Emily attended Syracuse University and graduated with a Bachelor of Architecture in 2015. Emily interned at Studio Geiger Architecture & Design in New York City and worked on the design of several single-family residential renovations within the city before moving to Baltimore after graduating. She began her career at Design Collective working on renovations, additions and new construction projects for Baltimore City Public Schools' 21st Century Schools program, including the recently completed Pimlico Elementary & Middle School, as well as interior renovations for Johns Hopkins University at its Homewood Campus and its School of Medicine.

Emily joined the AIA Baltimore chapter in 2015. She was introduced to the Future Architects Resources committee through her work as a participant and coordinator of the Adopt-A-School program at Design Collective over the past four years. She joins the FAR committee as co-chair in 2018 to promote the education of the built environment in the greater Baltimore community.

2019 Grand Design Award Winner

At-Turaif

Ayers Saint Gross

Ad'Diriyah, Saudi Arabia

At-Turaif is a UNESCO World Heritage Site—a city of towering mud brick palaces, mosques, and defensive walls founded in the 15th century. The city grew to be an important seat of power in the 18th and 19th centuries for the house of Saud, and the spread of the Islamic reform movement in the region. Through a comprehensive planning and design effort, the design team transformed the 58-acre site into a living museum and world-class cultural destination. A visitor center, farm, shaded walkways, exhibition galleries, signage, and multimedia have been carefully designed to fit within the existing ruins to welcome and educate the public. The design team did a great job creating accessible walkways that integrate into the archaeological fabric, while providing contemporary structures that don't disrupt the history of At-Turaif, notably by raising the walkways onto columns to hide the cabling. The design team was mindful of their impact and showed great attention to detail regarding the stabilization and reconstruction. The museum is harmonious to the natural environment in Saudi Arabia, and utilizes all the natural light, showing off the beautiful wood and stone interior details.

2019 AIA Baltimore/Neighborhood Design Center Social Equity Award//Excellence in Design Awards Honorable Mention

Baer City at the William S. Baer School

Alyssa Brown, Assoc. AIA || Briana Allen, Assoc. AIA

Tracey Beall || Jocelyn Christian || Tia Harris

Marcella Massa, Int'l Assoc. AIA

Baltimore, MD

Baer City demonstrates how with limited funding, architectural design can bring art, creativity and vibrancy to a space. With the guidance of a committed design team, the William S. Baer School transformed a deteriorating, inaccessible blacktop space into a sensory-driven, educational space that meets the special needs of its students with cognitive and physical disabilities. The jury also applauded the passion of the design team as emerging professionals in the architecture field.

Photo courtesy Gloria Cook Photography

Owner: William S. Baer School | Muralist: John Eichelberger

2019 Award for Excellence in Sustainable and Resilient Design

Smithsonian's National Zoo and Conservation Biology Institute

Quinn Evans

Washington, DC

This project honors the history of the Olmsted park, while providing a much needed facility and venue. The design goes above and beyond the LEED Gold standard by including thoughtful and sustainable exterior environments. For example, the Pollinator Playground and bio-retention spaces not only provide a much needed environment for pollinators, but aim to educate the next generation on the importance of these organisms and create a landscape that benefits both humans and wildlife. The jury liked the bird-friendly glazing, recognizing the role architecture plays in the well-being of bird populations.

Photo courtesy Joseph Romeo Photography

Owner: Smithsonian Institution | Contractor: Consigli | Landscape Architect: Rhodeside & Harwell, Inc. | Civil Engineer: AMT, LLC | Structural Engineer: Simpson Gumpertz & Heger | Mechanical & Electrical Engineer: Mueller Associates

2019 Michael F. Trostel, FAIA, Award for Excellence in Historic Preservation/Excellence in Design Award

Parker Metal

Design Architect: McInturff Architects

Interiors: Rory McCarthy Design

Baltimore, MD

The design team did a great job adapting the 1923 Parker Metal Decorating Company into a mixed-use facility. The jury appreciated how the use of exposed historic materials (brick, steel, wood, etc.) effectively strikes the delicate balance of restoration and reuse without losing the integrity of the original fabric. The design team showed great attention to detail with the interventions—the new materials are appropriate and fit seamlessly with the elements of the original structure. The new portion feels contemporary, while preserving the essential character of the former industrial building.

Photo courtesy Julia Heine

Owner: Himmelrich Associates, Inc. | Contractor: Inland Builders | Structural Engineer: Morabito Consultants | Mechanical Engineer: NW2 Engineers | Lighting Design: Bliss-Fasman | Code/Life Safety: EBL Engineers

2019 Exceptional Detail Award

Bayhealth Hospital, Sussex Campus

CannonDesign

Milford, DE

The inaugural Exceptional Detail Award goes to the Bayhealth Hospital for the wave wall. It is a beautiful example of excellent millwork, and a lot of work is done behind the scenes to make the wall fireproof. The design team also put a lot of thought into the exterior that goes beyond what would have been expected. There is an element of warmth and elegance not often found in healthcare environments that makes the environment much more welcoming, and references the natural world in what otherwise could be a sterile and clinical space.

Photo courtesy Craig Dugan Photography

Owner: Bayhealth Medical Center | Contractor: The Whiting Turner Contracting Company | Landscape Architects: Lee & Associates | Civil Engineer: Becker Morgan | Structural, Mechanical & Electrical Engineer: CannonDesign | Lighting Design, Environmental Graphics & Commissioning Coach: CannonDesign

2019 Excellence in Design Awards Honorable Mentions

Broadway Market

PI.KL Studio

Baltimore, MD

The design team did a fantastic job updating the 200 year old market to better support business and the community. They showed great attention to detail—the doorways are amazing. You can tell a lot of care went into restoring the market. The jury was impressed with the take on the “black box”—by providing a layer of glass between the box and the facade of the brick structure, the design acknowledges the history of the building and the wood shed structure. The jury appreciated how the shou sugi ban treatment draws the user to see the difference between old and new.

Photo courtesy Evan Woodard Photography

Owner: Baltimore Public Markets Corporation | Contractor: Plano Coudon | Landscape Architect: Red Sketch Landscape Architecture | Civil Engineer: Colbert Matz Rosenfelt, Inc. | Structural Engineer: Structura, Inc. | Mechanical & Electrical Engineer: Thomas Foulkes, LLC | Owner's Representative: Development Solutions, LLC | Graphic Design: Prisco Design, LLC | Sustainability Consultant: Doo Consulting, LLC

Photo courtesy Teri Pozniak Photography

Cosima at Mill No. 1

Alexander Design Studio

Baltimore, MD

This is a wonderful adaptive reuse project that transforms the boiler house of a 19th century mill into a high-end restaurant. The craftsmanship exemplifies what it means to do a renovation that does no harm. It respectfully honors the history of the mill, and creatively works within the confines of the historic structure. The jury particularly appreciated how the designers worked to create an open kitchen that highlights the cooking process, emphasizing how this is still a place where work is done and things are made.

Owner: Terra Nova Ventures, LLC | Contractor: Hencken & Gaines, Inc. | Civil Engineer: Gower Thompson | Structural Engineer: Skarda and Associates | Mechanical & Electrical Engineer: Henry Adams, LLC | Acoustics: Acoustical Design Collaborative, Ltd.

Eckerd College, The Helmar and Enole Nielsen Center for Visual Arts

Design Architect: Ayers Saint Gross

Local Architect & Interiors: Harvard Jolly

St. Petersburg, FL

The jury appreciated how the building was designed around natural light, and circulation with the natural environment. Students and faculty can thrive in this inspiring environment with extensive daylighting, connections to nature, and a sense of place and belonging on the campus.

Photo courtesy Tom Holdsworth

Owner: Eckerd College | Contractor: Biltmore Construction | Landscape Architect: Hardemen Kempton & Associates | Civil Engineer: Anderson Lane, Inc. | Structural Engineer: Pennoni (formerly McCarthy and Associates, Inc.) | Mechanical & Electrical Engineer: Griner Engineering | IT & A/V: Site Ready Design | Acoustics: Jaffe Holden | Geotechnical Engineering: Driggers Engineering

Benjamin W. Murch Elementary School

Design Architect: Hord Coplan Macht

Architect of Record: R. McGhee & Associates

Washington, DC

The jury appreciated how the scale of the school addition fits seamlessly into the neighborhood. The layout of the school is atypical of most elementary schools, but works to maintain a kid-friendly environment rich in natural light. The interior was designed with a child in mind from the design team's choice of colors and materials; it is warm and inviting for young ones, without causing over-stimulation. The "spine" organization allows for many windows, including in the gym, which is rare in a school environment.

Photo courtesy Judy Davis / Hoachlander Davis Photography

■ Owner: District of Columbia Department of General Services | Contractor: MCN Build

Rash Field Pavilion (Unbuilt)

Design Architect: Gensler

Landscape Architect: Mahan Rykiel Associates

Baltimore, MD

The jury was impressed with the choice of materials and how the use of lightweight steel will have a beautiful gentle impact on the landscape. Once complete, it will become an iconic park in Baltimore, and a beacon for the city. It is clearly designed as an elegant pavilion that will be playful, fun and practical for years to come. It will surely get a lot of use once it's built.

Photo courtesy Gensler

■ Owner: Waterfront Partnership | Civil Engineer: RKK | Structural Engineer: Simpson Gumpertz & Heger Inc. | Mechanical Engineer: CCJM

2019 Good Design = Good Business Awards

Now in its 13th year, the Good Design = Good Business Award awards honor architects and clients who best utilize good design to help companies and organizations achieve their goals. This award is intended to recognize projects where design excellence elevated the resulting benefit of a project to the business, institution, or community which it serves. In particular, it awards exceptional collaboration.

Sarah's Hope

Murphy & Dittenhafer Architects

Baltimore, MD

A derelict school was repurposed into a welcoming, safe, and dignified sanctuary for homeless children and families. The jury appreciated the project's powerful, positive aspects, and the examples it offers of effective client/architect collaboration and community engagement. School buildings are difficult building types to adapt, and this is a resourceful intervention. The spaces are modest but dignified, and offer good use of natural light. The exterior treatment blends well into the neighborhood around it.

Photo courtesy Alain Jaramillo

Owner: St. Vincent de Paul of Baltimore | Contractor: The Whiting Turner Contracting Company | Landscape Architect: Mahan Rykiel Associates | Civil & Structural Engineer: Carroll Engineering, Inc. | Mechanical & Electrical Engineer: James Posey Associates | MEP Engineering Services: Sidhu Associates, Inc. | Telecom & Security Consultant: Convergent Technologies Design Group, Inc. | Kitchen Design Consultant: Design & Drafting

Broadway Market

PI.KL Studio

Baltimore, MD

This important community project returned a historic fixture of the neighborhood to the urban fabric with renewed use and vitality. The design reclaims parking spaces to create nice outdoor spaces. The jury appreciated the flexibility of the design, which could reinvent itself in ten years at minimal cost.

Photo courtesy Evan Woodard Photography

Owner: Baltimore Public Markets Corporation | Contractor: Plano Coudon | Landscape Architect: Red Sketch Landscape Architecture | Civil Engineer: Colbert Matz Rosenfelt, Inc. | Structural Engineer: Structura, Inc. | Mechanical & Electrical Engineer: Thomas Foulkes, LLC | Owner's Representative: Development Solutions, LLC | Graphic Design: Prisco Design, LLC | Sustainability Consultant: Doo Consulting, LLC

Moxy DC

Fillat + Architecture

Washington, DC

This micro-hotel project offers a new archetype for travel that targets young people with small budgets. It offers a modest and clean design solution, and the submission addressed the criteria and metrics for the award in a clear way. The jury appreciated the fun and functional design that creates social interaction and activity within, and also pushes travelers outward into the city.

2019 AIA Baltimore Excellence in Design Awards People's Choice Award

MOI

FOX Architects

Baltimore, MD.

MOI, a regional furniture and interior solutions vendor, required a new headquarters in Baltimore. The design team's challenge was to design a space that is dual function: both a public-facing, highly flexible furniture showroom, and a semi-private workspace for the corporate headquarters staff.

Photo courtesy Ron Blunt

Owner: MOI | Contractor: Kinsley Construction | Structural Engineer: DIRT and Fire Tower Engineered Timber | Mechanical Engineer: GPI | Electrical Engineer: GPI | Client Project Manager: Cushman & Wakefield

2019 Baltimore Architecture Foundation Awards

Golden Griffin Award

Enoch Pratt Free Library

The selection of Enoch Pratt Free Library was based on the Library's patronage of architecture in Baltimore, including contemporary design and a commitment to maintenance of historic buildings. In addition to physical contributions, the library system has maintained a valuable archive of information regarding the history of Baltimore's built environment.

BAF's Golden Griffin Award is presented to an organization that has demonstrated a dedication to Architecture and to furthering its understanding in Baltimore.

Roger D. Redden Award

Rebecca Hoffberger

The BAF selected Rebecca Hoffberger for her role as founder, director, and principal curator of the American Visionary Arts Museum (AVAM). In her role at AVAM, Hoffberger has had a significant role in celebrating arts and culture in Baltimore and has shown a long-standing commitment to architecture, art and design.

The Roger D. Redden Award is presented to an individual who has demonstrated a lifelong dedication to Architecture and to furthering its understanding in Baltimore.

2019 FAR Scholarship Awards

The AIA Baltimore Future Architects Resources (FAR) Scholars Program was created in 2013. This is the 6th year of an annual scholarship open to students of architecture in their final year of graduate, undergraduate or community college programs in Maryland.

Graduate Student Design Project Award

Aperture

Eric Bos

University of Maryland

This project was extremely well thought out from a planning perspective down the most minute details focusing on an uncommon material with a high density program. The amount and quality of consistent graphics made it easy to understand, and the jury enjoyed seeing the progression from concept sketches to final renderings.

Community College Student Design Project Award

Chance, Order, Change, Annapolis Modern Art Museum

Mark Davis

Anne Arundel Community College

This project started off with a strong precedent and parti that developed into a creative solution with great graphics from start to finish. The jury appreciated the amount of process shown from hand sketching to model making that made for a powerful project.

Graduate Student Design Project Honorable Mention

Fluid E-Motion

David Keener

Morgan State University

This project used nice graphic language and 3D-printing to create an initial concept that developed into the structural design. The jury appreciated the unique representation technique as well as the forward thinking approach in regards to sustainability and building technology of the future.

Community College Student Design Project Honorable Mention

Ebb and Flow Ecological Center

Daniel Pardoe

Anne Arundel
Community College

This project was clear in its representation and had great process models that brought a difficult and interesting part into a successful design. The jury appreciated the response to difficult site conditions along with a thorough site analysis and the use of diagram in the design process.

2020 AIA BALTIMORE AND BAF EXCELLENCE IN DESIGN AWARDS WINNERS

Congratulations to the winners of the 2020 AIA Baltimore and BAF Excellence in Design Awards. The program recognizes excellence in architectural design by AIA Baltimore members and AIA members with projects in AIA Baltimore's region, and contributions to architecture and its understanding in Baltimore through the BAF Golden Griffin and Roger D. Redden Awards. Built and unbuilt projects submitted by AIA members were judged by a distinguished jury of AIA architects, this year based in Denver, Colorado. In response to AIA's commitment to climate action, AIA Baltimore and AIA Maryland components incorporated sustainability measures from the AIA COTE Top 10 Toolkit – now Framework for Design Excellence. For 2020 these included 5 of the 10 measures – Designing for Integration, Designing for Energy, Designing for Equitable Communities, Designing for Water and Designing for Resources.

2020 AIA Excellence in Design Awards Jury

Larry Friedberg, FAIA

Larry Friedberg recently retired after 25 years as the State Architect for Colorado. He has successfully championed the need for funding of public buildings by working with numerous governors and state legislatures to refocus the state's deferred maintenance program to improve facilities throughout the State of Colorado. He implemented and co-authored legislation codifying into law energy performance contracting and high-performance certification of public buildings. Friedberg successfully led preservation projects at the Colorado State Capitol building. As an outcome of Friedberg's 20 years of state service, integrity and innovation, the governor and legislature implemented legislation to permanently create the position of state architect by establishing the Office of the State Architect.

Elizabeth Hallas AIA, LEED AP BD+C | 2020 Design Awards Jury Chair

Liz Hallas is a Principal at Anderson Hallas Architects who manages the big picture. Her work is like puzzle-solving as she eyes each piece from leading design teams to building client relationships. She's responsible for quality control, assuring the firm runs smoothly, and that each project shines. One of her favorite projects was the Breckenridge Community Center, which converted a vacant school into a vibrant library, gathering space, and movie theatre. Projects that enhance communities and bring people together are what interest her. A past chair of Colorado Preservation Inc., she also served on the jury of AIA National's Honor Awards. She's devoted to her children and spends her free time attending her son's basketball games, and her daughter's swim meets. Otherwise, she enjoys yoga and tries to keep up with her two book clubs.

Julianne Schere, AIA, NCARB, LEED AP BD+C

Julianne Scherer, Managing Principal, is an influential leader at HDR with 26 years of experience. Community-driven projects intersect with her desire to positively impact the lives of others, the individuals she works with daily, and clients that embody diversity and unity to create a vision for the greater good. She is a graduate of Penn State University, has worked on many award-winning projects and is personally active in her community. Her personal achievements include a 2009 AIA Illinois John Wellborn Root Award for impressive service to the profession, 2015 46th Ward Good Neighbor Award and recognition in ENRs 40 under 40. She is an active member of AIA Colorado, for which she has served as a 2017 AIAIO jury chair, 2018 & 2019 AIA Design Awards committee chair and currently as the 2020 AIA Design & Practice Conference chair.

Larry Sykes, AIA

Larry Sykes, AIA, of Sykes Projects brings 14 years of experience designing modern, custom single-family homes at a variety of scales, from city to mountain landscapes, as well as commercial and multifamily projects. Rooted in the principles of modern design, his work is informed by the subtleties of landscape and context, and by the practical knowledge gained from a lifetime passion for building, restoring, and renovating. For Larry, the key to achieve quality, enduring buildings are cultivating fruitful working relationships with clients, builders, and craftspeople. Larry is a lifelong Denverite and is a Colorado registered architect. He is co-chair of AIA Colorado's Equity, Diversity and Inclusiveness Committee, and a member of the City of Denver Public Art Committee. He takes delight in photographing unexpected and underappreciated buildings and landscapes.

Marc Swackhamer, AIA

Marc Swackhamer's research practice HouMinn is a partnership with Blair Satterfield from the University of British Columbia. Their work challenges broadly accepted approaches to design agency through interdisciplinary partnerships, unconventional making, material misuse, and the role of decay in architecture. HouMinn has won national design awards from *Architect Magazine*, *ID Magazine*, and *Core77*. Marc's interdisciplinary design collaborative, MinnLab, won the Minneapolis "Creative City Challenge" and a Minnesota American Society of Landscape Architects Design Award. With Blaine Brownell, he authored the book *Hypernatural: Architecture's New Relationship with Nature*. Marc recently launched an interdisciplinary design research laboratory at the University of Colorado Denver called LoDo Lab, where he is Chair of the Architecture Department and Professor. He studied at the University of Cincinnati and Rice University.

2020 Excellence in Design Awards Good Design=Good Business Jury

Katie O'Meara

Katie O'Meara is a senior faculty member in the department of Architectural Design at the Maryland Institute College of Art, and an adjunct member of the faculty of Earth and Planetary Sciences at Johns Hopkins University. A registered architect with a background in architecture, landscape architecture and geography and a member of the planning committee for Restore America's Estuaries Summit, O'Meara practices landscape urbanism at the intersection of social justice and climate change, addressing flooding, blight and economic disparity in urban and coastal environments. O'Meara collaborates with practitioners, researchers and students, to develop spatial strategies to increase resiliency, equity and social mobility in vulnerable communities.

James French

Jim joined the French Development Company, Inc. in 2002 as Development Associate and has been active in the field of housing for over 30 years. Since 2008, he has been president and is responsible for the oversight of all real estate development projects. He has a firm understanding of project finance, capital budgeting, design and planning for affordable housing and community facilities. From 1993-2002, Jim was a senior planner for the Baltimore City Department of Planning. Prior to that he was a program manager in Baltimore City's Department of Housing and Community Development and the Housing Authority of Baltimore City from 1987-1993. He serves on the Baltimore Commission on Historic and Architectural Preservation, and the boards of Maryland Affordable Housing Coalition, the Bromo Tower Arts and Entertainment District, and the Baltimore Arts Realty Corporation.

Kristen Mitchell

Kristen Mitchell is the Executive Director of the Market Center Merchants Association and Market Center Community Development Corporation. She works with business, property owners, residents, and other stakeholders to revitalize Market Center, Baltimore's 27-block historic retail core, into a safe, bustling, multi-functional, multi-cultural, socioeconomically diverse community. Ms. Mitchell has also worked for the Maryland Department of Planning as manager of the Infrastructure and Development unit, the Baltimore Development Corporation as a senior economic development officer for northeast Baltimore, and 1000 Friends of Maryland. Ms. Mitchell serves on the Baltimore Heritage Board, chaired the Hamilton/Lauraville Main Street Economic Restructuring Committee, and chaired the Urban Land Institute-Baltimore District Council's Regionalism Committee.

2020 Residential Design Jury

Omar Calderon, AIA

Omar Calderon, AIA is a principal at Perkins Eastman with more than 15 years of planning and design leadership. Omar plays a central role in many of the firm's landmark projects, working on commercial, residential, public and education facilities. Building on an extensive design background in the residential sector, Omar's diverse range of experience in multiple practice areas gives him a unique perspective on building and planning, allowing him to focus on seeking value-added solutions at the intersection of design and programming. In addition to his accomplished architectural portfolio, Omar has served as a fellow for the New York Foundation for the Arts and has been a recipient of grants from the National Endowment for the Arts and the Graham Foundation for Advanced Studies in the Fine Arts.

Gabriel Kroiz, AIA

Gabriel Kroiz, AIA founder and principle of Kroiz Architecture has over 25 years of experience as an architect, builder, and educator. As an architect, Kroiz's experience includes award-winning projects in the US and Asia. As a builder, he has focused on small, detail intensive projects which allow for a high level of research and experimentation with materials and their application. In 2008 Kroiz joined the School of Architecture and Planning at Morgan State University as its first Program Director working to achieve the school's missions of providing access to the design professions for underrepresented minorities and performing research focused on the redevelopment of Baltimore and the surrounding region. He has contributed to research about Morgan in the areas of design pedagogy and campus design. In 2017 he was co-recipient of the ACSA Diversity Achievement Award for Morgan's Beginning Design Pedagogy and this program has risen nationally to number two in the production of Black Undergraduate Architects.

Delbert L. Adams

Delbert L. Adams grew up in Cleveland, Ohio working on properties throughout his youth within his parent's real estate business. These experiences fostered his love of construction and remodeling. After graduating from Babson College in Wellesley Massachusetts, he began his career in construction in the early 1980s in Baltimore. He currently is the founder and co-owner of Delbert Adams Construction Group. The company operates in the high end custom/luxury residential market, building and remodeling homes. Delbert also co-founded and co-owns Sunnyfields Cabinetry, a high-end design solution cabinetry and millwork showroom. Delbert serves on the Board of Preservation Maryland and Greater Baltimore Medical Center. He enjoys golf, ice hockey, hiking and family time with his wife and three grown children.

2020 Social Equity Jury

Leon Pinkett, III

Leon F. Pinkett, III was born and raised in Baltimore, Maryland, where he has dedicated the past 20 years to serving communities throughout the city, especially those in West Baltimore. Throughout his extensive career as a public servant in Baltimore City, Leon has proven experience in strengthening communities, community organizing and commercial development in urban centers. He has a demonstrated work ethic that is founded on personal initiative and dedication to the families of Baltimore. On December 8, 2016, Councilman Pinkett was sworn in as a member of the Baltimore City Council representing the 7th District. Mr. Pinkett served three years as the Assistant Deputy Mayor for the Office of Economic and Neighborhood Development, where he shared oversight of several key city agencies with a focus on developing revitalization efforts to strengthen and support communities throughout Baltimore.

Dr. Sheri Parks, Vice President of Strategic Initiatives, MICA

Dr. Parks comes to MICA from the University of Maryland, College Park (UMCP), where she was the inaugural Associate Dean for Research, Interdisciplinary Scholarship, and Programming for the College of Arts and Humanities. Through her position, she helped raise the profile of the college in the nation, as well as its levels of sponsored research, community engagement, and interdisciplinarity. Her research specializes in public aesthetics, particularly the ways in which people find and create meaning and beauty in their everyday lives, with specific emphasis on race, gender, social class, sexuality, popular culture, and media. Her most recent publication is *Fierce Angels: Living with a Legacy from the Sacred Dark Feminine to the Strong Black Woman*.

Marcella Massa, Int'l Associate AIA, MCA

Marcella Massa has a bachelors in Architecture and urban planning degree from the University of Cuiaba in 2010 and a master in interior design and lighting in 2012, both in Brazil. She became a licensed Architect and Urban Planner in 2011 in Brazil, and is working towards getting licensed in the United States. Marcella has extensive experience with retail, mixed-use projects, interior design, space planning, and master planning. In 2013, she and a partner received the best project award for Social Interaction in Milan Italy. Most recently, Marcella and a group of five Emerging Professionals women from Dream | Design | Activate won the 2019 AIA Baltimore Design Excellence Award for Social Equity and Honorable Mention. She is an active AIA Baltimore member and is passionate about helping others to achieve professional success and achieve licensure.

2020 AIA Baltimore Future Architects Resources (FAR) Scholarship Award Jury

The 2020 FAR Committee and Scholarship jury was FAR Co-Chairs Lonna Babu, AIA, and Emily Lodato, Assoc. AIA, both of Design Collective and Wadiah Akbar, Assoc. AIA of Quinn Evans.

Wadiah Akbar, Assoc. AIA

Wadiah Akbar is a designer at Quinn Evans' Baltimore office, focused on adaptive reuse projects of all kinds, with a particular interest in cultural and civic spaces. Wadiah graduated with a B.Sc in Architecture and an M.Arch from the University of Maryland School of Architecture. Wadiah began to explore the unique urban fabric of Baltimore through her graduate thesis, "An Architecture of Activism: Grassroots Organizing in the Digital Age", and has not turned back since.

Semans-Griswold Environmental Hall, Washington College

Ayers Saint Gross

Chestertown, MD

Semans-Griswold Environmental Hall is the new home of the Washington College Center for Environment and Society. The site is part of the watershed's coastal plain eco-region, a rich setting for a living laboratory that provides students with an immersive waterfront experience in support of the College's academic programs in environmental science and sustainability.

The building is designed to operate at net-positive energy and to meet the holistic standards of Living Building Challenge Petal Certification. It is expected to produce 105 percent of its energy needs on-site utilizing 300 rooftop photovoltaic solar panels and a ground-source geothermal heating and cooling system. The simple modesty of form and materials recalls surrounding tidewater vernacular of boat sheds, warehouses, and fisheries common to the area. Craft and detail are displayed in the building's cedar siding, porches and screens, and exposed wood roof trusses. The building celebrates natural light with a dual-sided rooftop clerestory and views to the riverfront landscape with ample glazing, operable windows, outdoor porches, and walkways. The building mass is designed to reduce cast shadows making it possible for future buildings to access solar energy.

Owner: Washington College | Architectural Design Team: Marie McKenna, AIA, Rosalie Tilghman, AIA, Robert Claiborne, AIA, Glenn Neighbors, AIA, Silvia Hasty, AIA, Danielle Bersch, AIA, Margaret Zivkovich, Joseph Burkhardt, Priscilla Korompis, Allison Wilson, AIA, Christopher Sillars, Connor Price, Margaret Baldwin, Eric Moss, AIA | General Contractor: Whiting Turner | Landscape Architect: Ayers Saint Gross | Civil Engineer: DMS & Associates | Mechanical Engineer: Gipe Associates, Inc. | Electrical Engineer: Gipe Associates, Inc. | Photography & Rendering: Tom Holdsworth

2020 AIA Baltimore/ Neighborhood Design Center Social Equity Award

The Social Equity Award, now in its third year, recognizes community-driven projects that promote social equity. The award is presented jointly by AIA Baltimore and the Neighborhood Design Center.

Restoration Gardens 2

Quinn Evans

Baltimore, MD

Restoration Gardens 2 is a 42-unit housing community for homeless youth located in the Pen Lucy neighborhood of East Baltimore. It provides private studio accommodations as well as spaces for workforce training, education, counseling, and other services to help residents become more stable and self-sufficient. It's exterior echoes the architectural heritage of nearby residential structures with a gabled roof and red brick façade, as well as an old stone wall and wrought-iron gate that were preserved at the request of community members. The space is thoughtfully designed to help break cycles of trauma and be a catalyst of economic development. The design intent is clear: this project will be a force for good within its community, by giving attention to an often-overlooked population.

Owner: Empire Homes of Maryland | Architectural Design Team: Brandon Schultz, AIA, LEED Homes, LEED AP BD+C; David Gavin, AIA, CPHC | General Contractor: Southway Builders | Civil Engineer: Colbert Matz Rosenfelt | Structural Engineer: Mincin Patel Milano | Mechanical & Electrical Engineering: Min Engineering | Photography and Renderings: Tom Holdsworth Photography; Alan Gilbert Photography

2020 Award for Excellence in Sustainable and Resilient Design

Powell Elementary School

ISTUDIO Architects

Washington, DC

Two new classroom wings were added to Powell Elementary School, bringing a historic building, constructed in 1929 into the 21st Century. The jury was quick to point out Powell Elementary's design intention as a laboratory of learning. The building embodies progressive sustainability strategies and passes that knowledge on to the next generation. The designers utilized standard cost-effective construction materials in a new, inventive way that can be replicated in other financially conscious public projects. Fresh air, natural daylighting, and outdoor program are the three key concepts that transform the architecture and create a healthy inspirational place for the community.

Architectural Design Team: Rick Schneider, AIA, LEED AP | General Contractor: MCN Build | Civil Engineer: AMT LLC | Structural Engineer: Simpson Gumpertz & Herger | Mechanical Engineer: Setty & Associates LTF | Electrical Engineer: Setty & Associates LTD | Photography & Rendering: Hoachlander Davis Photography + Dan Snook Photography

2020 Michael F. Trostel, FAIA, Award for Excellence in Historic Preservation//Excellence in Design Award Winner

The Enoch Pratt Free Library Central Library Renovation

Ayers Saint Gross with Beyer Blinder Belle

Baltimore, MD

The Central Library, finished in 1933 and occupying an entire city block, is a landmark on Cathedral Street and a beacon for the free dissemination of knowledge in the city. The restored and renovated spaces provide room for ample social and community services. The jury was impressed with the seamless modern interventions blended in with the historic fabric of the building. It is clear great care was taken so that these interventions even complement the original nature of the space. The new and improved Enoch Pratt Free Library enables the branch to live out its mission "to provide equal access to information, services, and opportunities that empower, enrich, and enhance the quality of life for all."

Owner: The Enoch Pratt Free Library | Design Team: Mike Barber, Daniel Lucenti, AIA Allison Wilson, AIA, Lindsay Story, Maegan Smith, Margaret Zivkovich, Elizabeth R. Leber, AIA, Jean Campbell, AIA, Bob Stern, Asli Ataov Baydur, Lauren Cawse, AIA | Design Architect: Beyer Blinder Belle | General Contractor: Gilbane | Civil Engineer: AMT Engineering | Structural Engineer: Restl | Mechanical & Electrical Engineer: Mueller | Photography & Rendering: Joseph Romeo

2020 Exceptional Detail Award

Robert W. Deutsch Foundation Building – 2519 N. Charles St. Redevelopment

Ziger|Snead Architects

Baltimore, MD

This beautiful renovation of the former Afro-American Newspaper building at 2519 North Charles Street, provides offices, a training room, and shared meeting and support spaces for two arts-based non-profit organizations – the Robert W. Deutsch Foundation and Baltimore Arts Realty Corporation. The jury was moved by the artist collaborations that enabled the monumental design impact through the use of paint. The mural reinforces the form and entry and announces to the community something new is here. The result is a bright and lively space that reflects the energy and optimism of the Deutsch Foundation's community mission.

Owner: Robert W. Deutsch Foundation | Architectural Design Team: Ziger|Snead Architects; Steve Ziger, FAIA, Jonathan Lessem, AIA, LEED AP, Kyle Mastalinski, Assoc. AIA, Katherine LePage, AIA, Sheldon Alfred | General Contractor: Kaliber Construction, Inc. | Structural Engineer: Morabito Consultants | Mechanical & Electrical Engineer: Burdette, Koehler, Murphy & Associates | Photography & Rendering: Karl Connolly

2020 Excellence in Design Award Winners

E.I507

PI.KL Studio

Baltimore, MD

Built behind the façade of a former one-story woodshop in the historic Douglass District of Baltimore, E.I507 is a row house that moonlights as a venue for audiences to explore culture. When programmed, it hosts art openings, screenings and performances. The jury was struck by the designer's successful manipulation of space to increase the amount of natural light, the preservation of the exterior façade, and lastly the creation of a beautiful, comfortable, and contemporary interior.

Owner: Jennifer and Scott Burkholder | Architectural Team: Pavlina Ilieva, AIA and Kuo Pao Lian, Principals | General Contractor: PI.KL Construction | Structural Engineer: Structura Inc. | Photography & Rendering: Stephen Norris

A. Hoen & Co. Lithograph Center for Neighborhood Innovation

Ziger|Snead Architects

Baltimore, MD

Ziger|Snead Architects had the challenge of restoring and repurposing the historic A. Hoen & Co. Lithograph Complex as a mixed-use development to house offices for community-based nonprofits. This project shows great attention to detail and maintains its historic integrity while the adaptive reuse achieves LEED gold status. Tax credits for historic rehabilitation are key to the success of the project and the restoration of this building meets the high standards of the Maryland Historic Trust and the National Park Services. The repurposing of the structure is a great improvement to an area of Baltimore that is going to benefit from its community programming. Its sensitive restoration allows new discoveries each time you look at the structure. The exterior spaces captured between the historic buildings create a courtyard for community events and outdoor seating, contributing to the sense of energy and activity of the campus.

Owner: Cross Street Partners, LLC | Architectural Design Team: Steve Ziger, FAIA, Jonathan Lessem, AIA, LEED AP, Mihar Morimoto, AIA, Kelly Danz, AIA, Matt Rouse, AIA, William Hallgren; Katie Zaeh, AIA; Conor Brady; Darragh Brady; Will Rohde, AIA | General Contractors: Cross Street Partners, LLC | Civil Engineering: STV, Inc. | Structural Engineering: I200 Architectural Engineers | Mechanical & Electrical Engineering: James Posey Associates, Inc. | Photography & Rendering: Jennifer Hughes

Tubman Elementary School

ISTUDIO Architects

Washington, DC

The new design space for the DCPS's pilot outdoor garden program sought to connect the learning of an outdoor classroom and reap the benefits of healthy food knowledge that could then be shared at home. The pavilions form is a playful moment beckoning back to making paper airplanes. The folded roof planes celebrate the rain cycle by capturing rainwater and displaying it through exposed scuppers and rain chains. Good design provides a foundation for unforeseen added benefits, such as a quiet testing space for children, after school farmer's market, and space for evening community events. The result is more than the sum of its parts. Architecture that inspires us to do, teach and celebrate.

Owner: DC Department of General Services + DC Public Schools | Architectural Design Team: Rick Schneider, AIA, Marisa King, AIA, Dan Snook | General Contractor: Broughton Construction | Civil Engineering: AMT, LLC | Photography & Rendering: Dan Snook

The Voxel – Adaptive Reuse of the Autograph Playhouse

Ziger|Snead Architects

The Autograph Playhouse was left mainly forgotten after it closed in 1985. This renovation is intentionally conceived as a flexible and changeable space informed by community use. In computer graphics, a voxel is a three-dimensional pixel that is rendered in a grid in relation to other voxels, and that metaphor can be seen within the design. During the day, the mesh façade disappears and lets the authentic brick be visible. At night, light is projected onto the façade with dynamic control for varied rendering of color, motion, and sound using software developed by Figure 53. The design is beautifully proportioned, with ample natural light and is respectful of the original design. The project successfully communicates its two missions: by day, it is the teaching center and research lab for Figure 53; by night, it is a theater, incubator, and resource for performing artists.

Owner: Figure 53 | Architectural Design Team: Steve Ziger, FAIA ; Michael Westrate ; Jonathan Lessem, AIA, LEED AP, Keith Peiffer, AIA, Will Rohde, AIA, Andrew Chaveas | General Contractor: Plano-Coudon, LLC | Civil Engineering: STV, Inc. | Structural Engineering: Structura, Inc. | Mechanical & Electrical Engineer: James Posey Associates, Inc. | Photography & Rendering: Karl Connolly

2020 Excellence in Design Award Winner & 2020 Excellence in Design Award Honorable Mention (Residential)

D House

PI.KL Studio

Baltimore, MD

This renovation of an 1870s dilapidated rowhome in Baltimore's historic Fells Point neighborhood, D House, is a fantastic example of what preservationists want to see in a historic property: a sensitive integration between the retained existing space and the addition. The historic front facade along Dallas Street is restored as a new three-story volume rises in the rear, replacing multiple additions and reclaiming the use of the entire site. The addition is clean and unobtrusive from the street and respects the historic district. The interior is cohesive while presenting contrast from the exterior front to back. D House was developed, designed and built by the architect and offers a contemporary approach to the eclectic range of remodels in the neighborhood, where an architect is typically only marginally involved.

Owner: Pavlina Ilieva and Kuo Pao Lian | Architectural Design Team: Pavlina Ilieva, AIA and Kuo Pao Lian, Principals | General Construction: PI.KL Construction | Photography & Rendering: Stephen Norris

2020 Excellence in Design Awards Honorable Mentions

Maryland Institute College of Art Dolphin Design Center

GWWO Architects

Baltimore, MD

The state-of-the-art “Maker Building” was designed to house space for MICA’s product design, architectural design, and interactive arts/ game design departments as well as fabrication and exhibit spaces. The new building puts the acts of making on display via well-placed façade transparency and opportunities for both interior and exterior art installations. Flexible power access and movable furniture encourage students and faculty to move around, interact, share resources, and solve challenges. The building’s balance of modernity and contextuality seamlessly integrates it into both campus and neighborhood and provides current and future generations of artists and designers with a facility that inspires creativity, invention, collaboration, and entrepreneurship.

Owner: Maryland Institute College of Art | Architectural Design Team: Alan Reed, FAIA, Terry Squyres, AIA, LEED AP; Kathy Speicher Melluish, AIA, LEED AP; Lauren Park, AIA, LEED AP BD+C, WELL AP; Kate Scurlock, AIA | General Contractor: Southway Builders, Inc. | Civil Engineering: Morris & Ritchie Associates, Inc. | Structural Engineering: Hope Furrer Associates | Mechanical & Electrical Engineering: James Posey Associates, Inc. | Photography & Rendering: Karl Connolly

Marvin Gaye Recreation Center

ISTUDIO Architects

Washington, DC

The Marvin Gaye Recreation Center is the city’s first rec center with integrated natural ventilation. It is a building that breathes: when conditions are right, the building enters natural ventilation mode and was designed to take advantage of the mild temperatures during the fall and spring in Washington, DC. Daylighting strategies define the architecture and create a vibrant interior environment. They provide dynamic and diffused light, and a striking visual connection to nature. Works by local artists on glass are incorporated into the interior architecture in transparent layers of biomorphic forms. The center provides a sustainable space for culture and creativity to flourish. A design that the jury described as: inspiring, progressive, and with expansive attitude towards resiliency.

Owner: DC Department of General Services | Architectural Design Team: Rick Schneider, AIA, LEED AP / Marisa King, AIA, LEED AP / Dan Snook | General Contractor: MCN Build | Civil Engineering: AMT LLC | Structural Engineering: Simpson Gumpertz & Herger | Mechanical & Electrical Engineering: Setty & Associates LTD | Photography & Rendering: Hoachlander Davis Photography

Hancock Community Library

Murphy & Dittenhafer Architects

Hancock, MD

The architectural goal was to design a very simple elegant building infused with a sense of dignity and pride for the small town Western Maryland community. At only 8,500 gross square feet, the design is focused on flexibility, clarity, user comfort and natural daylight. The linear layout of spaces is an "open plan" arrangement "front to back" with as few walls and enclosed rooms as possible. A heavy timber beam system and structural wood deck is exposed in the primary reading areas where clerestory natural daylighting is combined with direct daylight. The onlooker is drawn to the warmth of the materials, and how creatively the designers showed restraint in keeping those materials clean and warm, successfully creating an inviting atmosphere where one could only hope to spend a few quiet hours reading.

Owner: Washington County Free Library | Architectural Design Team: Frank E. Dittenhafer, II, FAIA, LEED AP; Todd R. Grove, AIA; Bruce R. Johnson, AIA, LEED AP, Patrick L. Ness, Associate AIA, Kevin Stick | General Contractor: The Eagle Construction Company | Civil Engineering: Triad Engineering, Inc. | Structural Engineering: Matonak, Snyder & Associates, Inc. | Mechanical & Electrical Engineering: L.S. Grim Consulting Engineers, Inc. | Photography & Rendering: Alain Jaramillo

2020 Excellence in Design Awards Winner (Residential) & 2020 Excellence in Design Awards Honorable Mention

The Light House

PI.KL Studio

Baltimore, MD

Inspired by Scandinavian modern, light-filled spaces and natural warm material palette, The Light House takes advantage of the site by positioning the main stair in the center of the building volume, which allows natural light to penetrate deep into the space and illuminate the house from within. This contemporary home, developed, designed and built by the architect on one of the few vacant lots in Ridgely's Delight, celebrates the existing urban fabric and translates its language to the present. The light-filled interiors are grounded with a matte stained concrete floor on the first level and natural, warm maple hardwood floors throughout the rest of the house.

Owner: Pavlina Ilieva and Kuo Pao Lian | Architectural Design Team: Pavlina Ilieva, AIA and Kuo Pao Lian, Principals | General Contractor: PI.KL Construction | Civil Engineering: Colbert Matz Rosenfelt, Inc. | Structural Engineering: Peter Malmquist | Photography & Rendering: Stephen Norris

2020 Excellence in Design Awards Honorable Mentions (Residential)

Greenspring Valley Residence

Marren Architects

The task: updating a run-of-the-mill developer house for a young family needing to update their outdated kitchen and dining area. The renovation began with a very clean and contemporary kitchen update transitioning to more natural materials as you move through the new dining room towards the outdoor covered patio and into natural setting just outside the home. The interior was given new life with a new contemporary kitchen and elegant vaulted ceilings of vertical-grain Douglas-Fir wood roof trusses. The patio, also featuring Douglas-Fir wood roof trusses and a new outdoor fireplace, is built open on three sides and features large picture windows that cascade the patio with beautiful outdoor views. This housing update adds continuous connection to the forested lot outside. The new outdoor space is warm and inviting, and a welcoming respite, especially in 2020.

Architectural Design Team: Martin JW Marren, AIA | General Contractor: Gregory Custom Remodeling, LLC | Structural Engineering: Structural Solutions, Inc. | Photography & Rendering: Alan Gilbert

Baltimore City Residence

Suzanne Frasier, FAIA, NOMA, ASID, CID, CPHC and Wright & Robinson Architects

The project is the renovation of and an addition to a modest shingled frame dwelling with the aim of maximizing accessibility and one-story living for the owner's ultimate objective of aging in place. Every space on the first floor is fully accessible so that the owner can live comfortably in them during those periods of compromised mobility we all would be wise to anticipate. The interior is characterized by strong colors and visually striking, generously scaled wallpapers. The new screened porch is a tall volume that presents a bravura black-and-silver elevation to the garden. Most of the original house was retained, with the exception of its tumble-down front porch. All other significant fabric was retained including the sound mid-century cladding of mineral shingles.

Architectural Design Team: Mark Wright, AIA; Suzanne Frasier, FAIA, NOMA, ASID, CID, CPHC | in collaboration with: Wright & Robinson Architects | General Contractor: Withheld at the owners request | Photography & Rendering: Greg Dohler

2020 Good Design = Good Business Awards

Forest Park High School

Smolen Emr Ilkovitch Architects

Baltimore, MD

With collaboration and holistic design solutions, the design team transformed an outdated space into a welcoming, naturally lit, and sustainable academic and community environment with a LEED Silver rating. The high school now features a variety of learning environments extending beyond the classroom to accommodate all learning styles, student collaboration, and a variety of learning group sizes. The school combines an energetic, forward-thinking architectural aesthetic with an aggressive design solution.

Owner: 21st Century School Buildings Program | Architectural Design Team: Ran Ilkovitch NCARB, AIA (Principal, Project Manager) | General Contractor: HESS Construction | Landscape Architect: Site Resources, Inc. | Civil Engineering: Site Resources, Inc. | Structural Engineering: Columbia Engineering, Inc. | Mechanical & Electrical Engineering: Gipe Associates, Inc. | Photography: Lester Escobar

2020 AIA Maryland Collaborative Video Gallery

This year to emphasize good design in Maryland to clients and the public, and to better serve our members, AIA Baltimore collaborated with AIA Chesapeake Bay, AIA Maryland, and AIA Potomac Valley to create a video gallery of the 2020 Design Award Winners. To see AIA Baltimore's winning videos visit: AIA Baltimore's YouTube channel. Go to YouTube.com, and search AIA Baltimore.

W.L. Gore & Associates Container Labs

Clark & Rinehart Design Group

Baltimore, MD

W.L. Gore and Associates was in desperate need of an upgrade to an existing lab and office space in one of their existing pilot plants. With various extreme restraints, W.L. Gore worked to create a seamless, environmental, creative, and cost-effective solution. These restraints pointed the team to prefabrication and shipping containers. The height of these containers measured perfectly to fit into the limited height space and they could be customized and prefabricated offsite allowing the owner to continue their sensitive production without interruption. Because of these quick and creative solutions, the office was able to creatively utilize vertical space, was 20% cheaper than a conventional construction project and used 75% less construction time.

Owner: W.L. Gore and Associates | Architectural Team: Richard Rinehart, AIA, Tina Lucarelli, Sara Resinger, Victoria Eckhardt | General Contractor: MDavis Inc. | Structural Engineer: Ikoniq | Mechanical & Electrical Engineer | Photography & Rendering: Herbert Studios; Renderings – C+R Design Group

2020 Baltimore Architecture Foundation Awards

Golden Griffin Award

Neighborhood Design Center

The Neighborhood Design Center has demonstrated a commitment to the built environment for over 50 years. BAF commends NDC for its role in supporting neighborhoods through community design, engagement, planning, and for providing the tools and expertise to help communities realize their visions. This year's timely Design for Distancing project demonstrates how the design community, local government, and stakeholders can work together to respond to a crisis with strong design solutions that can be adapted in Baltimore and around the world.

BAF's Golden Griffin Award is presented to an organization that has demonstrated a dedication to Architecture and to furthering its understanding in Baltimore.

Roger D. Redden Award

Mary Ellen Hayward

For her long standing contribution as historian, preservationist, museum curator and founder of the Irish Railroad Workers Museum, this posthumous award recognizes the significant role and many accomplishments of Dr. Mary Ellen Hayward.

The Roger D. Redden Award is presented to an individual who has demonstrated a lifelong dedication to Architecture and to furthering its understanding in Baltimore.

2020 FAR Scholarship Awards

The AIA Baltimore Future Architects Resources (FAR) Scholars Program was created in 2013. This is the 7th year of an annual scholarship open to students of architecture in their final year of graduate, undergraduate or community college programs in Maryland.

Graduate Student Design Award Winner: Palate Perfected

David Bloch and Alex Wong

Morgan State School of Architecture + Planning

The jury appreciated the overall concept which expands on the industrial history of Baltimore and its architecture. The proposed choice of materials given the context truly considered both macro and micro scale for how this ties into the urban context and the user experience.

Honorable Mention Graduate Student: The Village: A new School of the Built Environment

Shayne Piltz

University of Maryland, College Park

This project proposes a very nice re-imagination of a campus architecture building—modernizing aspects while preserving the essential, traditional character of the campus. The perspectives are so compelling. One juror remarked, “I wish my architecture school looked like this!”

Undergraduate Student Design Award Winner: Beacon Library

Lauren McNamara

University of Maryland, College Park

The design objective is clear, and the choice of minimal hand graphics beautifully communicates this oasis for learning amidst a buzzing street junction. The jury appreciated the response to difficult site conditions along with a thorough site analysis.

Community College Student Design Award Winner: Sanctuary

Mateo Escobosa

Anne Arundel Community College

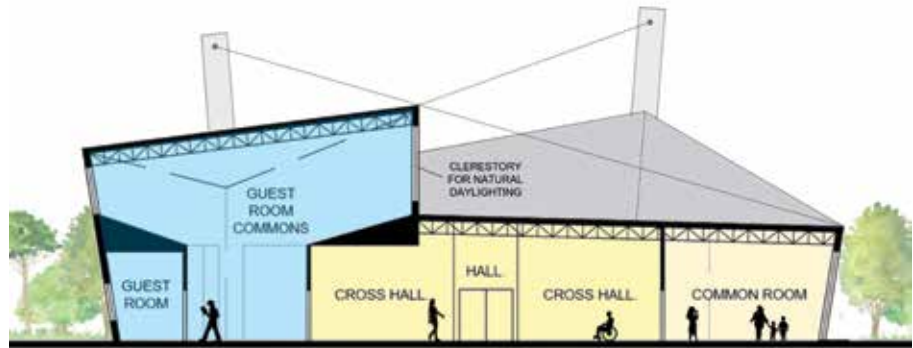

The student delivered a fantastic narrative from start to finish, through sketches, exceptional model-making and finally, a powerful rendering to bring it all together. The jury appreciated the thoughtful site analysis and the various considerations in a potentially harsh climate zone.

The judges noted this project had a solid use of a parti and study models. The proposed design appears viable and is a space design for a youth hostel and in a likewise beautiful setting.

Davin S. Hong, AIA

332 St. Paul Place
Baltimore, MD 21202
410.928.4056
dhong@livingdesignlab.com
www.livingdesignlab.com

Living Design Lab is a Baltimore-based minority-owned small business that applies architecture, interior design, planning, and urban design to holistically solve social, economic and environmental problems. The firm was established in 2013 and has since become recognized for its thought leadership, design excellence and public advocacy. Coming from global design firms, principals Davin Hong and Kevin Day have formed Living Design Lab as a small firm uniquely equipped with big firm expertise. Together, the team boasts an acclaimed portfolio of diverse project types, varying in scale, use, and complexity. The firm applies a multidisciplinary and collaborative approach to ensure projects are successful by every measure. The approach goes beyond the traditional boundaries of the design profession to engage projects from conception to realization, leveraging research, analyses and design thinking to best inform clients' decisions.

T3XTURE is an international publication created in Baltimore for architects, artists, writers, and designers interested in architecture and the arts.

T3XTURE seeks to elevate the discourse on texture, ornament and pattern to the level currently paid to space and tectonics. Each issue collects architectural projects, drawings, poems, and photographs from contributors from all over the world based on a predetermined theme.

Issues No. 1 T3XTURE,
No. 2 ORNAMENT IS SPLENDID!,
No. 3 PATTERN IS MADDENING, and
No. 4 THE EDGE OF EDGE
are available through Amazon.com,
www.t3xture.com, or the new
Baltimore Design Center.

No. 5 REPOSE AND ENERGY
will be available late 2020.
www.t3xture.com

REPOSE

OE Custom transforms local fallen trees into heirloom furniture and architectural features for the residential and commercial markets.

- CUSTOM DESIGN & FABRICATION
- SELECT STOCK LUMBER SALES

Enduring. Driven. Visionary.

Reaching the century mark isn't easy – you have to be quality-driven, client-focused, and have a vision for the future. At 100 years, STV is looking ahead. Our planners, architects, engineers and program/construction managers have a stake in the business, and are committed to quality performance. We provide personal attention and timely solutions, with an eye toward sustainability. And with more than 40 offices, we are a local firm with national resources.

When it comes to getting your project delivered right, choose the firm that has the drive and vision to be the best.

Spending less
on energy

means **more money** where it matters.
stretches **critical resources**.
moves **business** forward.

An Exelon Company

More and more businesses are finding that energy efficiency is mission critical to minimize costs, defer equipment replacement and ensure continuity of operations.

BGE can help. We have tools to help you better understand your usage patterns and energy-saving solutions to help businesses of all types and sizes. Plus, financial incentives could cover up to **75% of the cost of qualifying energy efficiency improvements.**

**ENERGY-
SAVING
SOLUTIONS
AVAILABLE**
